Hi Paul,

I am not sure you are aware of the disposition of three recommendations by IDWR. Any document from IDWR for SF5 processing will not contain the three permits 47-7700, 47-7702, 47-7991 or the permit now license 47-7768 that has had an NCAP ADR as licensed. Adding any condition or remark to a standing Permit is not appropriate. The time for remarks or conditions would be more appropriate at the stage of licensing these permits, presuming the permit holder completes the appropriation process.

I just wanted to make sure in the counting of the water right recommendation numbers you had a reason IDWR had not supplied revised recommendations.

Thanks; we are all making good progress on the process.
