Subject: RE: Transfer Application 75264, DDR Nampa LLC

Steve,

- 1) The well drilled under 63-20787 will be used for 63-33210. No new well.
- 2) 63-33210 does not overlap 63-20787. DDR Nampa purchased the 30-acre supplemental water right for the 107-acre development site and filed the transfer application. DDR Nampa could not provide evidence of ownership for 63-20787 until after the transfer application was filed, but can use the additional 1.5 acres of irrigation on the same site. I will advise them to file a transfer application to show the 1.5 acres within the PPU, but cannot guarantee when that will happen.

How will this work for purposes of the approved transfer? Can you condition 63-33210 and 63-20787 to a total of 31.5 acres to clarify the relationship between the two rights?

*NO - But d'base noted
e this*

Roxanne

Subject: Transfer Application 75264, DDR Nampa LLC

Hi Roxanne:

I am wrapping up some details left over from Sharla's work so we can approve this transfer. Already advertised and no protests.

When filed last November, the transfer proposed a split of 63-8737. After this and that, DDR Nampa portion of that right is now listed as 63-33210. The latter number is the one used to process the transfer.

DDR Nampa owns 63-20787 (previously Rae) in NESW Section 18. IDWR GIS layer shows that well adjacent to well for the transfer. Right 63-20787 includes 1.5 acres irrigation associated with 5112 Stamm Lane.

Here are my overlap questions:

- 1) Does transfer propose to use well from 63-20787 or to drill a new well? Cannot tell from the transfer application.
- 2) If same well, do the proposed 30 acres in transfer include the 1.5 acres irrigation in 63-20787, or are those different acres?

Thank you for your help. We can approve the transfer once we clear up this minor overlap information.

Steve
