Subject: Troost Dairy Transfers (73902 and 73903)
Attachments: Transfer Pg 1 Part 1.pdf; Revised Attachment 1_B.pdf

Mr. Lester,

You had telephoned on October 14, 2009 to request clarification of a couple of details regarding the two Applications for Transfer from Troost Dairy (73902 and 73903).

Attached, please find a revised Attachment 1B for transfer (#1 of 2) (73902), which is the location map. The map shows the correct location of the "LIND #2" well to be in the SWSW Sec 26. The text of the application is correct; the original map had it wrong.

Second, you asked about the basis for the fee for Application (#2 of 2) (73903). The note on the first page of Application for Transfer (#2 of 2) describes that the filing fee should be based on 87 acres. Please note that the number should be 88 acres (not 87). The 88 acres is the number of irrigated acres listed in Transfer 5546 in the NESW, SESW, and the SWSE of Sec 36. The Troost Dairy is built on these quarter-quarter sections and no irrigation takes place there; only stock watering and commercial uses. To preserve these 88 acres of irrigation, the applicant seeks to move those 88 acres to a new Place Of Use within the newly defined PPU's. The Application for Transfer (#1 of 2) moves 38 of the 88 acres to Farm #2. Application for Transfer (#2 of 2) moves the remaining 50 acres into the newly defined PPU for continued irrigation use.

Also, I noticed that Attachment #2A of Application (#2 of 2) had a mistake in the title. Attached is a revised version that also includes some summary information that may help you.

I hope this note and attachment answers your questions. Please let me know if you need additional information.
