RE: Permit 35-13886- amended

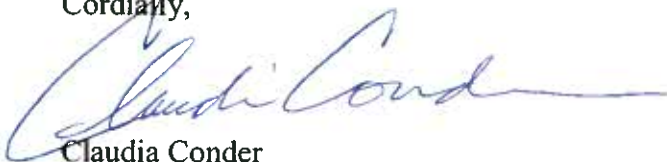

Dear Sharla,

Please find enclosed the amended application as per our discussion and previous correspondence. I have verified that the point of diversion and place of use are in the same quarter quarter-NWNW of Section 7, T. 1 N. R. 37 E. I have made the correction on page 2.

Also enclosed is a copy of the sprinkler plan and the landscape plan for the substation. The sprinkler plan shows a drip system around the substation that is designed for the well to pump 28 gpm at 50 psi. A controller actuates the pump and limits the volume of water based on the timer. The plan also shows each sprinkler head capacity (.05 gpm for the shrubs and 1 gpm for the trees). It is anticipated that each station (4 stations) would run 15 minutes/day maximum during the irrigation season.

If you have any further questions, please contact me at (801)220-2252 or by e-mail at Claudia.Conder@PacifiCorp.com

Cordially,

Claudia Conder
Water Rights Administrator for PacifiCorp
