RE: Change of Ownership for water right 29-7000A

Mr. Morgan:

In reviewing your change of ownership form submitted 5-25-04, some problems have arisen which need your attention.

Water rights 29-7000A and 29-7000B were joined together in a permissible place of use (PPU) by a transfer completed in April of 2001. In March of 2004 a partial decree from the SRBA court was issued to record these water rights according to the transfer. I have enclosed a copy of both partial decrees. Since these water rights are appurtenant to the commonly described place of use, the water rights are generally conveyed together.

You are, however, entitled to 6 acres of those water rights. There are two options for getting your portion of the water rights in your name. One would be to separate the water rights by a water deed, quit claim deed or other conveyance document which would specify the water right for your property and the water right for the rest of the land.

The other option is to split both water rights and you would receive a portion of each water right. In that case, the department would need to charge an additional fee of \$100 to split the second water right.

I will hold any further action on this change of ownership until I hear from you or receive additional documentation or fees. Please feel free to contact me if you have additional questions.

Sincerely,

Sandy Egbert
GIS Specialist
