

MEMORANDUM

Date: October 27, 2009
To: Water Right File 36-16156
From: Nick Van Dyke
Re: possible injury analysis

A short analysis was done to see if there could be possible injury to nearby wells resulting from the well associated with Application for Permit No. 36-16156. At a distance in every direction equivalent to 36-16156's well's distance from the Snake River, every well, for which a well log could be obtained, was examined. There are no wells within the distance described above that are drilled nearly as deep as the well appurtenant to 36-16156.
