

MEMORANDUM

Date: October 16, 2009
To: Transfer 75605
From: amerritt
Re: review and approval

This application was processed in the region. The application was advertised without protest. In reviewing Stanton comments about acre limit for 43-13350, review finds that both T4465 approved in 1995 and later T70599 approved in 2004 affirm that there should be 180.5 acres for 43-2434A which later became 43-13350. There was a transcription error from approved transfer T70599 and the NCAP. The acre limit is correct at 180.5 and is being corrected in this approval. The transfer is being approved in the region.
