RE: Application for Exchanged Flows, Macks Creek

Dear Mr. Orndorff:

Enclosed is the completed application for permit which we discussed. Please sign and return to me with a \$120.00 application fee.

The maximum diverted volume of 200 acre-feet per season as shown on the application was selected based upon the expected duration of use of this right. When the Watermaster is no longer in service, any remaining flows which might still be available in the upper reaches of Macks Creek may be diverted under the Macks Creek decreed rights for those acres. If you wish to specify more volume, please let me know. The application fee will be greater for an increased application volume.

Also enclosed is information from Leupold & Stevens, Inc. regarding the purchase of hand held staff gages. Our office staff and most Watermasters carry a one-foot gage which is marked in 0.02 foot increments (at last purchase date: \$17.95 + shipping). Head readings to the nearest 0.01 foot are necessary for use with most weir and flume discharge tables such as those found in the U of I Water Measurement Handbook.

Pre-fabricated weirs and flumes have been purchased by our department from Honkers Supreme (formerly Powlus Manufacturing) in Twin Falls. They may be contacted at 269 1/2 Addison Ave West, Twin Falls, ID 83301, phone 208-734-2060.

Please return the enclosed application and fee as soon as possible for processing. Please contact me if you have questions. Thank you again for your cooperation.

Sincerely,

Cindy Hodges

Cindy Hodges
Sr. Water Resource Agent
