		Average 2002-2005									

*Shares are applicable to all properties served under one entity, ie several headgates

****Total allotment based on all shares**

***Total use based on tabulated seasonal delivery through each headgate, 17B, 17C

****IPC0 buyout- not utilized in average annual diversion although som 444 acres was irrigated with groundwater (diesel pumps) and SRCC water

Average total water requirement for 2002-2005 based on acreage and 2.60 af/a CU is 1278.4 af
Percentage surface water use for this period is 381/1278.4=30% so ground water use is estimated at 70%

The number of shares and SRCC allotment each year is not indicative of volume of water diverted to the Faria and Loughmiller acreage since the number of SRCC shares is the total belonging to the water user and not the total applicable to the area served by Laterals 17B and 17C.
