Transfer No. 73718

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1

Name of applicant Loughmiller, Inc Phone (208) 733-5761Post Office address 3170 Highway 93, Twin Falls, Idaho 83301**A. PURPOSE OF TRANSFER**

1. ☒ Change point of diversion ☒ Add diversion point ☒ Change place of use
☐ Change nature of use ☐ Change period of use ☒ Other create a PPU

2. Describe the reason for the proposed changes Create a permissible place of use in order to
provide better management of the property, update the POD's, move the POU due to
to sell of the property, and change the right to a primary right.

B. DESCRIPTION OF RIGHT(S) OR PORTION THEREOF, AFTER THE REQUESTED CHANGE

1. Right Number Portion 47-8011A Priority 08/05/1985 Amount (cfs/ac-ft) 1.09/--- Nature of Use Irrigation Period of Use 04/01 to 10/31
to
to
2. Total amount of water being transferred 1.09* cubic feet per second and/or _____ acre-feet per annum.
3. Source of water Ground Water tributary to _____
4. Point(s) of Diversion:

Lot	1/4	1/4	1/4	Sec.	Twp.	Rge	County	Local name for diversion
	SE	SE	SE	12	12S	16E	Twin Falls	Irrigation Well #1
	NE	NW	SE	12	12S	16E	Twin Falls	Irrigation Well #2

5. Lands irrigated or place of use:

Twp.	Rge.	Sec.	NE 1/4				NW 1/4				SW 1/4				SE 1/4				Totals
			NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	
12S	16E	12		40															40
12S	16E	13					40			40									80

PART 1**6. General Information:**

- a. Description of diversion system (see system schematic) Two wells service the irrigation system and supplement the water delivered by the Salmon River Canal Company.
Both wells and surface water diversions are diverted to a pond and then rediverted via two booster pumps. The system will be extended for the new POU once the transfer is approved.
- b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?
☐ Yes ☒ No. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.
- c. Describe the effect on the land now irrigated if the place of use is changed pursuant to this transfer:
118.7 acres of this property will no longer be irrigated by 47-8011A
- d. Remarks:
*This portion of 47-8011A will be limited to the irrigation of 85.5 acres per irrigation season, 1.09 cfs, and will be a primary ground water right. This is based on a historical use of 72% ground water on the current POU.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Transfer of Water Rights No. _____
And said application is hereby _____, subject to the following limitations and conditions:

APPLICATION FOR TRANSFER OF WATER RIGHT

PART 2

(Attach one copy for each right)

A. DESCRIPTION OF RIGHT AS RECORDED

1. Right evidenced by:

- a. Decree No. _____ Decreed to _____
in case of _____ vs. _____
dated _____ in _____ county of _____
- b. License No. 47-8011A issued by the Idaho Department of Water Resources.
- c. Claim No. _____ on file with the Idaho Department of Water Resources.
- d. Transfer No. _____ which produced this right.

2. Attach a copy of last year's tax notice for the property to which the water right is appurtenant or other documents which show ownership. Label document as attachment A. check appropriate box below.

☐ Tax notice☒ Warranty Deed☐ Other _____

3. Source of water Ground water tributary to _____

4. Date of priority 08/05/1985

5. Water is used for the following purpose:

Amount 1.87/--- for Irrigation purposes from 04/01 to 10/31
(cfs/ac-ft) _____
Amount _____ for _____ purposes from _____ to _____
(cfs/ac-ft) _____
Amount _____ for _____ purposes from _____ to _____
(cfs/ac-ft) _____

6. Total amount of water under right 1.87 cubic feet per second and/or _____ acre-feet per annum.

7. Point(s) of Diversion:

Lot	1/4	1/4	1/4	Sec.	Twp.	Rge	County	Local name for diversion
	SE	SE	SE	12	12S	16E	Twin Falls	
	SE	SE	SE	12	12S	16E	Twin Falls	

8. Lands irrigated or place of use:

Twp.	Rge.	Sec.	NE 1/4				NW 1/4				SW 1/4				SE 1/4				Totals
			NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	
12S	16E	13	40	40	40	40													160

Total acres 160*

*The supplemental right is allowed to irrigate 146 acres within the described POU.

9. Describe any other water rights used for the same purpose as described above Permit 47-8238 describes the
same POD and use

10. To your knowledge, has any portion of this water right undergone a period of five or more consecutive years of non-use?

No _____ If yes, describe _____

B. DESCRIPTION OF PORTION OF RIGHT BEING TRANSFERRED

(if the entire right is to be changed by the applicant, omit part B and C)

1. Amount 1.52/--- for Irrigation purposes from 04/01 to 10/31
 (cfs/ac-ft)
 Amount _____ for _____ purposes from _____ to _____
 (cfs/ac-ft)

2. Point(s) of Diversion:

Lot	1/4	1/4	1/4	Sec.	Twp.	Rge	County	Local name for diversion

LIMITED POWER OF ATTORNEY

KNOWN ALL MEN BY THESE PRESENT:

I, Loughmiller, Inc., c/o William Loughmiller, hereby nominate and appoint
Daren T. Nelson (Brockway Engineering, PLLC) as my attorney-in-fact with full
authority to act for and on my behalf to undertake any and all acts or matters pertaining to water
right transfers before the Idaho Department of Water Resources for the following water right
transactions:

Transfers regarding 47-8011A and 47-13651

in Twin Falls County, Idaho. Additionally, I hereby ratify and confirm any
and all such acts on matters as contemplated herein.

My agent is hereby authorized to sign, seal and deliver, as my act in deed, those said
instruments of writing that may be necessary or proper to carry into execution and effect the
applications, and transfers above-mentioned. Further, I hereby declare that each and every
application, transfer, agreement, receipt, or payment which shall be by my said agent given,
made or done for the aforesaid purposes shall be as good, valid, and effectual as if they had
been signed, sealed, and delivered by me in my own proper person; and I hereby undertake at
all times to ratify whatsoever my said agent shall lawfully do or cause to be done in or
concerning the said premises by virtue of these present. This Limited Power of Attorney will
become void upon approval, denial or withdrawal of the above referenced applications.

Dated this 14 day of Oct 2005

William Loughmiller

Supporting Narrative (revised 10/31/05)

Loughmiller, Inc. Transfer

Project #: 824-01-2005

Brockway Engineering is submitting the attached transfer applications on behalf of Loughmiller, Inc. The first transfer will be for the conversion of a portion of the supplemental ground water irrigation right (47-8011A) to stockwater/commercial use for an expansion of the existing hog facilities. These hog facilities are located in the NW ¼ of section 13, Township 12S, Range 16E, and in the SE ¼ of section 12, Township 12S, Range 16E (Figure 1). The second transfer will then move the remaining portion of 47-8011A to the NW ¼ of section 13, Township 12S, Range 16E, and section 12, Township 12S, Range 16E.

Overview of Current Rights, Property, and Irrigation System

Water right 47-8011A currently describes a place of use in the NE ¼ of section 13, Township 12S, Range 16E. Loughmiller, Inc. sold the land appurtenant to the water right in September 2001 to Manuel and Mary Faria, but supposedly retained the right. However, since the warranty deed did not specify the retaining of this water right by Loughmiller, Inc. the water right accidentally was sold with the land transaction. Because of this error, Faria is giving back this water right to Loughmiller, Inc. as seen in the attached Quitclaim Deed. In addition, a change of ownership for 47-8011A was never filed since Faria and Loughmiller, Inc. was under the pretense that this water right was retained by Loughmiller, Inc. during this transaction.

Loughmiller, Inc. currently owns all of the land in the NW ¼ of section 13, Township 12S, Range 16E, and section 12, Township 12S, Range 16E. The current water system for the hog facilities and the surrounding fields are depicted in the attached water system schematic (Figure 2) and an explanation of the system will be described below. There are three water rights appurtenant to the property depicted in the schematic (47-8011A, 47-8238, and 47-13651) and will also be outlined below.

Water right 47-8011A was recently licensed in 2005. The right's place of use (POU) is in the NE ¼ of section 13, Township 12S, Range 16E and has two points of diversion (POD's). When the original permit was submitted Irrigation Well #1 (IW-1) and Irrigation Well #2 (IW-2) was listed as the POD's for this right. However, when the field exam was completed IW-2 was not included in the recommendation. Instead, Stockwater Well #2 (Sk-2) was recommended as a POD, since it was also connected to the irrigation system. Sk-2 has since been disconnected from the irrigation system and now only supplies water to the southern hog facility. Therefore, within these transfers these corrections will be proposed.

The water pumped from Irrigation Well #1 discharges into a canal that then runs north until it connects with another canal and intermingles with water delivered by the Salmon

River Canal Company (SRCC). The northern hog facility is on stilts over this pond. This canal then runs west and discharges into the pond surrounding the northern hog facility. In addition, the water pumped from IW-2 also discharges directly into this pond. The water then is pumped out of the pond by two booster pumps into the distribution system.

Water right 47-8238 is a permit that is used for irrigation. Its proof of beneficial use was filed on July 22, 1996 (six days after the field exam was completed for 47-8011A), and is awaiting a field exam to be completed by IDWR. The POU for the permit includes almost all of section 12, Township 12S, Range 16E, and describes both IW-1 and IW-2 as being POD's. The POU for this permit is distributed with the same system as that in place for 47-8011A and in effect treats both of the rights as being in a PPU.

Water right 47-13651 is a partially decreed stockwater right that services the northern hog facility from Sk-1. The southern hog facility is serviced by Sk-2 and assumes a stockwater exemption under 42-111a of the Idaho Code. Periodically the water from Sk-1 and Sk-2 is used to flush out the waste in the facilities, and this waste then is discharged into the pond.

Even though Loughmiller, Inc. no longer owns the NE ¼ of section 13, Township 12S, Range 16E they still provide water to the Faria's property when the SRCC can not provide enough water for the crops in the NE ¼ of section 13. Therefore, water from 47-8011A still is used to irrigate the portion of land that was sold to Faria. Water pumped from IW-1 could irrigate this property via the mainline from the north pond or a pipeline can be installed at the wellhead to divert the water to a southern pond on the property now owned by Faria. This southern pond can be recharged by the water from IW-1 or from water delivered by the SRCC, via headgate 17-B. This water is then pumped out of this pond by another booster pump and into the distribution system.

Transfer #1: Conversion of a Portion of 47-8011A for Stockwater/Commercial Use

The goal of this transfer is to provide approximately 26,000 gpd for the stock at the existing hog facilities located on the property, and to provide enough water to flush and clean the facilities. Currently the facilities are serviced by two separate wells, Stk-1 and Stk-2. The northern facility utilizes water right 47-13651, a partially decreed stockwater right, whereas the southern facility assumes a stockwater exemption under 42-111a of the Idaho Code.

In order to provide enough water for the expansion of these facilities it is being proposed that a portion of 47-8011A be converted from irrigation for stockwater and commercial uses. Since 47-8011A is a supplemental ground water right it was required to determine how much ground water was irrigating the POU. The irrigation system for 47-8011A is interconnected with the irrigation system for 47-8238 and the system irrigates both of the rights POU's. Therefore, it was concluded that the only way in which to determine the amount of irrigated lands that were being irrigated by ground water was to calculate the

amount of inflows (ground and surface water sources) for the entire farm and determine the percentage of ground water applied to the farm.

Power records for IW-1 and IW-2 were analyzed and a power consumption coefficient was determined to estimate the volume of ground water pumped from the aquifer. These volumes were then compared with the surface water deliveries from the SRCC to determine the average ground water usage. The average ground water usage from 2000-2005 was calculated to be 72% of the total water supply.

In order to determine the amount of water needed for the hog facilities after the expansion, an analysis was completed for the water requirements of the stock and commercial usages at the facility (see Water Usage Spreadsheet). The water requirement values for pigs are estimated from four separate sources in the Water Usage Spreadsheet. In order to be conservative we based our analysis off the average high values from these sources that would be required for the stock. It was estimated that 26,000 gpd (29.2 afa) would provide enough stockwater for approximately 9,018 pigs. However, water right 47-13651 has historically provided approximately 11,406 gpd (11.2) for the stock; therefore, only 14,594 gpd (16.4 afa) of additional water would be required for the stock. In addition, Bob Ohlensehlen of Nutrient Management Solutions, LLC calculated that the facilities would need approximately 9,075,331 gpy (28 afa) to provide enough water to flush and clean the facilities. Therefore, the facilities would need a grand total of 44.4 afa of additional water for stockwater/commercial purposes.

In order to mitigate for the new uses that this transfer is proposing we needed to determine the historical consumptive use of 47-8011A. The acres that will be dried up according to this transfer are located in the NE ¼, NE ¼ of section 12, Township 12S, Range 16E, and the crop with the highest consumptive use value that has ever been farmed in this field is alfalfa (see FSA records). Therefore, the conversion of 44.4 afa of 47-8011A to stockwater/commercial use is based on the consumptive value of alfalfa at the Hollister weather station (Allen and Brockway, 1983). Since, only 72% of the land is irrigated by ground water only 72% of the consumptive value of alfalfa can be used in the calculation. Thus, in order to transfer 44.4 afa of 47-8011A for stockwater and commercial uses, 29.9 acres ($44.4 \text{ afa} / (2.60 \text{ af/ac} * 0.72) = 23.7 \text{ acres}$) would be required to be dried up. Currently this property is being farmed by Faria, and Loughmiller, Inc. delivers water to Faria's property, via 47-8011A, when deliveries from SRCC are inadequate. In order to ensure that this land is going to be dried up, Loughmiller, Inc. is proposing to disallow the use of this water on the said property by disconnecting it from the irrigation system. The remaining portion of water right 47-8011A will then be converted to a primary ground water right, and moved to other portions of Loughmiller, Inc. property, according to Transfer #2 (see below).

Transfer #1 will also be correcting and adding POD's associated with water right 47-13651. The current POD listed for this right is incorrect and this transfer will be correcting this error.

Transfer #2: Move Remaining Portion of 47-8011A for Irrigation

The goal of this transfer is to move the remaining portion of 47-8011A to the E ½, NW ¼ of section 13, Township 12S, Range 16E, and NW ¼, NE ¼, section 12, Township 12S, Range 16E and change it from a supplemental to primary groundwater right. In order to ensure that the 27.3 acres being dried up in the former transfer are actually being taken out of production, Loughmiller, Inc. will no longer provide supplemental ground water to Faria's property in the NE ¼ of section 12, Township 12S, Range 16E and will disconnect this portion of the property from the irrigation system. Since, the 27.3 acres of the property will be taken out of production according to Transfer #1 there will be 118.7 acres remaining that can be moved to other properties. However, since it is being proposed that the right become a primary right, only the historical use of the ground water right on the 118.7 acres can be transferred. As mentioned in the narrative for Transfer #1, it has been determined that this right has provided 72% of the water to these acres. Therefore, this transfer is proposing that the new POU be located in the E ½, NW ¼ of section 13, Township 12S, Range 16E, and NW ¼, NE ¼, section 12, Township 12S, Range 16E and would be able to irrigate 85.5 acres ($118.7 \text{ acres} * 72\% = 85.5 \text{ acres}$). Since, this area is more than 85.5 acres the transfer is proposing that the right be a PPU so that the right can irrigate any property within this POU as long as it limits the irrigation to 85.5 acres per irrigation system.

Estimate of Ground Water vs. Surface Water Irrigation

Year	Estimated from Power records		SCRR Deliveries	
	IW-1	IW-2	Sect. 12 (Lateral 17 Headgate 17-C)	Sect. 13 (Lateral 17 Headgate 17-B)
2000	393.82	449.80	265.00	0.00
2001*	400.74	485.91	284.00	0.00
2002	471.39	513.37	236.00	64.00
2003	475.14	545.49	266.00	0.00
2004	429.97	515.50	264.00	210.00
2005	233.37	405.38	430.00	54.00

*In 2001 Loughmiller Inc. took part in the Idaho Power buyout. However, 444.2 acres were still irrigated with ground water and SRCC water. Both the wells and booster pumps were powered with diesel generators. Therefore, the values for the wells are an average of the volumes used in 2000, 2002-2005.

Year	Irr Ac	Total AF	Acre-Feet/Acre	SW %	GW %
2000	676.10	1108.61	1.64	0.24	0.76
2001*	456.70	1170.65	2.56	0.24	0.76
2002	632.00	1284.76	2.03	0.23	0.77

Estimate of Well Withdrawal Volume

Brockway Engineering, PLLC

Well: Loughmiller - Old Well at Flats (IW-2)

Use pumping water level and efficiency to develop theoretical PCC.

Motor HP: 200
Pumping level: 530 feet
Discharge pressure: 0 psi
Discharge line diameter: 8 inches
Pump efficiency: 75.0%
Electrical efficiency: 95.0%

Theoretical Q: 2.37 cfs = 1064 gpm
Discharge line velocity: 6.79 ft/s
TDH: 530.7 feet
Theoretical PCC: 762.8 KWH / ac-ft

NOTE: The following statements are made in accordance with the Privacy Act of 1974(5 USC 552a). The Agricultural Adjustment Act of 1938, as amended, and the Agricultural Act of 1949, as amended, authorized the collection of the following data. The data will be used to determine eligibility for assistance. Furnishing the data is voluntary, however, without it assistance cannot be provided. The data may be furnished to any agency responsible for enforcing the provisions of the Acts.

Public reporting burden for this collection of information is estimated to average 15 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate, or any other aspect of this collection of information, including suggestions for reducing this burden, to the Department of Agriculture, Clearance Officer, Ag Box 7630, Washington, D.C. 20250; and to the Office of Management and Budget, Paperwork Reduction Project (OMB No. 0560-0004), Washington, D.C. 20503. RETURN THIS COMPLETED FORM TO YOUR FSA COUNTY OFFICE.

NOTE: The following statements are made in accordance with the Privacy Act of 1974(5 USC 552a). The Agricultural Adjustment Act of 1938, as amended, and the Agricultural Act of 1949, as amended, authorized the collection of the following data. The data will be used to determine eligibility for assistance. Furnishing the data is voluntary, however, without it assistance cannot be provided. The data may be furnished to any agency responsible for enforcing the provisions of the Acts.

Public reporting burden for this collection of information is estimated to average 15 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate, or any other aspect of this collection of information, including suggestions for reducing this burden, to the Department of Agriculture, Clearance Officer, Ag Box 7630, Washington, D.C. 20250; and to the Office of Management and Budget, Paperwork Reduction Project (OMB No. 0560-0004), Washington, D.C. 20503. RETURN THIS COMPLETED FORM TO YOUR FSA COUNTY OFFICE.

NOTE: The following statements are made in accordance with the Privacy Act of 1974(5 USC 552a). The Agricultural Adjustment Act of 1938, as amended, and the Agricultural Act of 1949, as amended, authorized the collection of the following data. The data will be used to determine eligibility for assistance. Furnishing the data is voluntary, however, without it assistance cannot be provided. The data may be furnished to any agency responsible for enforcing the provisions of the Acts.

Public reporting burden for this collection of information is estimated to average 15 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate, or any other aspect of this collection of information, including suggestions for reducing this burden, to the Department of Agriculture, Clearance Officer, Ag Box 7630, Washington, D.C. 20250; and to the Office of Management and Budget, Paperwork Reduction Project (OMB No. 0560-0004), Washington, D.C. 20503. RETURN THIS COMPLETED FORM TO YOUR FSA COUNTY OFFICE.

Darren Nelson
Brockway Engineering
2016 North Washington St.
Suite 4
Twin Falls, ID 83301

Dear Mr. Nelson:

Please find enclosed two water right transfer applications in the name of Loughmiller Inc that you recently submitted to our office. Also enclosed is the \$330.00 check (Brockway Engineering check # 5900) that accompanied the applications. Note that one of the transfers proposes transferring a total of 0.55 cfs (\$250.00 filing fee) and the other transfer proposes transferring a total of 1.99 cfs (\$290.00 filing fee). Also note that the transfers propose transferring portions of right 47-8011A totaling 2.5 cfs, when right 47-8011A only allows for a total diversion of 1.87 cfs. -

Allen Merritt and I had an opportunity to briefly review the transfer applications and the analysis of the historical use of right 47-8011A and had several items of concern that need to be addressed....

The crop history analysis and FSA records that were submitted to support the analysis are not clear as to exactly what crops were grown where. In particular, the analysis and FSA records do not shed much light on the crop history on the Northeast $\frac{1}{4}$ of Section 13 (T12S, R16E), the authorized place of use of right 47-8011A. There was a map included with the FSA records that appears to identify at least some of the land in Section 12 as part of FSA tract 31989, but it is not clear as to exactly where all of the fields are located.

13 LAND
Merritt
It also appears that FSA tract 31736 does not have anything to do with any land in Sections 12 or 13, but probably involves land in Sections 25 and 36. Crop history records need to be provided to show what crops, and how many acres, were historically irrigated in the Northeast $\frac{1}{4}$ of Section 13, the authorized place of use for the right proposed to be transferred.

Review of the Salmon River Canal Company records indicates that the available delivery does not always match the actual delivery records. For example, in 2003, Manuel Faria had a Salmon River Canal Company allotment of 102.87 ac-ft, but transferred the water (presumably to another farm's head gate) and did not use the allotted water that year. It is very questionable how much credit for supplemental groundwater pumping can be allotted for a year when canal water was available to be used, but was not used for reasons not related to lack of availability. Note that license 47-8011A contains the following conditions....

065 The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.

And

104 If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.

Another item of concern related to the Salmon River Canal Company records relates to the fact that the last five or six years were used in the analysis of canal company delivery and groundwater pumping, when relatively speaking the five year average canal company allotment for the years 2000 – 2004 (0.357) is significantly lower than the 10, 25, and 50 year average canal company allotments (0.73, 0.79, and 0.798 respectively).

* In reviewing the "Estimate of Well Withdrawal Volume" analysis for irrigation well #1 (authorized diversion point for right 47-8011A) it appears that a theoretical diversion rate of 2.09 cfs was used in the PCC calculation. Note that water right 47-8011A only allows for a total diversion of 1.87 cfs. In addition, examination of the licensing exam for right 47-8011A reveals that well #1 has a measured capacity of 1.78 cfs. Using 1.78 cfs in the irrigation well #1 analysis, rather than the 2.09 cfs results in estimated well volumes about 15% smaller than the volumes calculated in the analysis.

These appear to be rather complicated transfers with difficult issues relating to quantifying the allowable amount of historical water use available to be transferred under right 47-8011A. Examination of the schematic and photos that you provided with the applications indicates that there is a booster pump (12S16E1310) at the south pond. Perhaps exploring use of this pump may help shed some light on the amount of water used in the Northeast ¼ of Section 13 (T12S, R16E), the authorized place of use of right 47-8011A. If needed, Allen and I are available to further discuss these transfers and potential issues.

Sincerely,

Corey Skinner, PE
Water Resource Engineer
