Subject: Water Supply Bank applications

Jim,

I received your inquiry into the status of the five water supply bank applications for DOT, LLP. I apologize for the delay. I have a couple of questions prior to acceptance into bank. Irrigated land associated with a right in the bank usually may not be irrigated with any water right while a right for irrigation of the land is in the bank. Irrigated land generally must be "dried up" for the duration of the lease period. Water right 71-10665A overlaps three of the rights offered to the bank, but has not itself been offered to the bank. Is there a reason the applicant wishes to retain use of the right?

I reviewed the ownership change forms submitted for the rights offered. The NWSE of Section 22, T07N R14E is described under right 71-7009 for the stock water use, but does not appear to be represented on the deed provided. Is this land owned by the applicant?

Incidentally, I hope to finalize the Roy Woods license for right no. 37-20809 this week.

Let me know if you have any questions.

Thank you,
Cynthia
