I can delete them from the pedigree without any problem, but I figured they would at least be retrievable in Receive or Amend Claim.

No... They do show up in pedigree as closed AJ children. Don't know how to fix that or if it is even a problem. Sorry, again. Kay

Kay,

No problem. The two numbers you are not going to use are not even showing up in Information Search. Were you able to delete them?

Subject: Recommendation 02-2053

Hi, Carter.

I have made a big mess of this recommendation. BLM objected to the recommend because a small portion of the p/u was on their property. Simplot filed a transfer (75758) to move the land to a different place of use. Most of the land they planned to move the right to was already covered under Snake River water so they had to file an additional transfer (75905) to move a portion of the water to a different point of diversion and place of use. I had originally split 02-2053 into Nos. 02-10437 and 02-10438 to accomplish Transfer 75758. When Simplot amended Transfer 75758 to reduce it and filed Transfer 75905 for remainder I wanted to process both transfers at one time so created 3 new numbers to accomplish this. When all is said and done Nos. 02-10437 and 02-10438 will not be used. Rt. 02-10439 will be remainder of original recommendation of 02-2053, Rt. 02-10440 will be water under Transfer 75758 and Rt. 02-10441 will be water under Transfer 75905. I am still in early phases of getting these reviewed and then will need to advertise. I just thought I had better let you know in case someone looks at Rt. 02-2053 and wonders what in the world is happening to it.

I am sorry I have made such a mess but hopefully will get it all straightened out in a short period of time.

Kay
