

MEMORANDUM

Date: September 23, 2009
To: Water Right File 45-14183
From: amerritt
Re: review and recommendation

This application was processed in parallel with State Office staff and Watermaster of WDO1. The application was advertised without protest. This application is for development of surface water above Milner Dam and potentially impacts storage credits for BID and also may impact hydropower plants at Milner and below. I recommend approval but request that legal and administration review this application as well as the agreements associated with it and the current recommended conditions.
