RE: Notice of Diversion for Instream Stockwater Use:85-15699

Dear Mr. McCann

On April 28, 2008, the Northern Region office of the Idaho Department of Water Resources received your notice 85-15699 to divert surface water from a stream into a trough. Although your application was accepted, critical information was not provided on the application form. In order to complete the database entry for this notice, I found it was necessary to make some inferences about your use and intent.

This letter is to inform you that estimates of the stream's beginning and ending points and of the place-of-use on your property have been made. I have included a computer printout of the point and polygon shapes overlying recent aerial photography of the area. Although its not essential, I would appreciate confirmation from you that the inferences the Department made matches your use. If I do not hear back from you, I will assume that you are satisfied with how the Department is depicting your instream stockwater use.

If you have any questions regarding this matter please call me at (208) 287-4945 or email me at Michele.Edl@idwr.idaho.gov.

Sincerely,

Michele Edl
Associate Engineer
