Jeanie,

I have confirmed with the county that the 4.4 acres is BLM lands and should not be included in PPU. Also water right 47-13176 is not part of either transfer.

Thanks,

Amy

I am hoping to get the two transfers to advertising soon and since I still haven't heard from you guys, I am tempted to just recommend the PPU to be minus the 4.4 acres in the SWSE of Section 6, as it is on BLM ground. Surely they will protest it if there is no agreement with them.

We had one more question regarding domestic and stockwater right 47-13176 (copy attached). It was not included in the dairy transfer and doesn't need to be if it has its own separate system, but the well is in the SENWSW of Section 33 and according to the mapping diagram of the well system, there are several wells there. Was this right missed and should it be included in the dairy transfer?

Jeanie

I will look that over Jeanie and get back with you asap.

Thanks,

Amy

I think that a previous transfer's (#5588) map showed that little "nubbin" in the SWSE of Section 6 but the table never mentioned any acres there, so I'm thinking we should just remove it from the proposed PPU of this transfer?? Perhaps it was just an error that slipped through before we had access to the taxlot information and realized it is actually owned by the BLM. Like I said, the acres weren't really listed, just the map seemed to show it.
