RE: Transfer 74415 for 57-11633 Etc. -- Correct Points of Diversion

Unruh filed Transfer 74415 for odd-numbered rights 57-11633 thru 57-11655 to add a new well to the combined system. The system had two wells before the transfer. The transfer was correctly approved in April 2008 (not erroneously approved).

Unruh had another related problem and needed a drilling permit to modify one of the original wells. The drilling permit for that was approved, and the work was completed by early 2009, tag D0053488.

Rob Whitney confirmed the actual location of the modified well different than described by Transfer 74415. This memo documents the information for the water right files for possible follow up later in time.

The old well listed for NENESW is actually just over the line in NWNWSE (GPS data).

Transfer Memo #24, Pages 5-6 states "the department will not initiate an enforcement action against the water right owner due to the discrepancy between the water right record and the referenced location if the discrepancy is created by better methodology and is not due to a change in the physical location."

The filing fee for a simple records-correction transfer in this case would be another \$450, the discounted amount under Transfer 74415. At this time, it is not worth soliciting anything to correct this mistake. Instead, noting the files is sufficient, particularly since it seems somewhat likely the owner will be in contact later to make some other adjustment to these rights (based on my personal experience with Unruh over many years). The error can be corrected later if necessary.

This information is filed with 57-11633. A database comment about this was added to that record today. An informational flyer is filed with the other rights for a heads-up in this regard.

ACTION OF THE DEPARTMENT OF WATER RESOURCES
APPROVED

This Permit is

Date

1-16-09

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. **READ CAREFULLY!**

GENERAL CONDITIONS:

1. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one(1) year from the approval date for completion of the well unless an extension has been granted.
2. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare, which may be required before construction of the well. All wells must be drilled a minimum distance of 100 feet from a drain field. Domestic and Public Water Supply wells must be drilled a minimum of 50 feet and 100 feet respectively from a septic tank.
3. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
4. Approval of this drilling permit does not authorize trespass on the land of another party.
5. This permit does not constitute other local, county, state or federal approvals, which may be required for construction of a well.
6. This drilling permit does not represent a right to divert and use the water of the State of Idaho. If the well being drilled is associated with approved water right(s), use of the well must comply with conditions of said water right(s).
7. If a bottom hole temperature of 85 or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
8. Idaho Code, S 55-2201 - 55-2210 requires the applicant and/or his contractors to contact "Digline" (DigLine is a one-call center for utility notification) not less than 2 working days prior to the start of any excavation for this project. The "DigLine" Number for your area is 1-800-342-1585.
9. Please be advised that this drilling permit should be considered and treated as a preliminary permit. If you are in disagreement with this preliminary permit you have fourteen (14) days of the service date of this permit to petition the Department for reconsideration pursuant to Section 67-5243, Idaho Code.
10. The well tag for the drilling permit/start card shall be securely and permanently attached to the well casing through welding or by the use of four closed-end domed stainless steel pop rivets. The tag attachment will be done at the time of completion of the well, and prior to removing the drill rig from the drill site.
