RE: Licensing

I linked the large POU boundary for this license to the city's other rights. I left a message with Dave Richards at the city last week in regard to an updated city boundary but he did not respond. At this time I will assume that there is not an updated shape.

Attached to this memo is a summary of all of Idaho Falls rights as of this year and water use data submitted by the city referenced in Shelley Keen's 9/10 memo.

RE: City of Idaho Falls Water Rights

Dear Roger:

Please find attached two updated Water Use vs. Water Right Comparison charts with accompanying data. Previous charts that were distributed during our previous discussion on Thursday, May 6, 2004 may be discarded. I have updated the values based on the most current licensing information as determined by the IDWR. Please refer to the accompanying Water Rights Summary data sheet to verify the accuracy of indicated flow values.

Please note that some data included on the Water Rights Summary data sheet have been printed in bold, purple text. These acre-feet/annum values have been calculated as we had discussed on May 6. The CFS values approved on the license have been multiplied by 1.98 to convert to acre-feet/day and then multiplied again by 365 to achieve acre-feet/year. Should you have any questions or concerns regarding the accuracy of my calculations, please contact me so that we may discuss them.

I trust that this current information will expedite the approval process for the Well #13-B water right application. This information should eliminate any doubt as to whether or not the City of Idaho Falls has sufficient rights to drill this well. If you need any additional information for the approval process, please contact me immediately as time is of the essence for this well project. Your cooperation in this matter is greatly appreciated.

Sincerely,

A handwritten signature in cursive script, appearing to read "David P. Richards".
