STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of Idaho

1. Name of Applicant CDS Stoneridge Utilities LLC dba Stoneridge Water Company Phone 208-437-2180
Mailing address P.O. Box 298 Blanchard ID 83804 Email _____
2. Source of water supply Ground which is a tributary of _____
3. Location of point of diversion is Township 54N Range 5W Sec. 20 in the 1/4,
NW 1/4, SW 1/4, Govt. Lot _____, B.M. _____, Bonner County;
additional points of diversion if any: 3 P.O.'s in well field
4. Water will be used for the following purposes:
Amount 2.22 for Municipal purposes from Jan/1 to Dec/31 (both dates inclusive)
(cfs or acre-feet per year)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
5. Total quantity to be appropriated is (a) 2.22 and/or (b) _____
cubic feet per second acre feet per year
6. Proposed diverting works:
a. Describe type and size of devices used to divert water from the source _____
b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet;
total reservoir capacity _____ acre-feet
c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet
d. Is ground water with a temperature of greater than 85°F being sought? _____
e. If well is already drilled, when? 2005; Drilling firm Intermountain Drilling;
Well was drilled for (well owner) Stoneridge Water Company; Drilling Permit 00040131
7. Time required for completion of works and application of water to proposed beneficial use is 5 years (minimum 1 year)
8. Description of proposed uses (if irrigation only, go to item 9):
a. Hydropower; show total feet of head and proposed capacity in kW. _____
b. Stockwatering; list number and kind of livestock. _____
c. Municipal; show name of municipality. Stoneridge Water Company
d. Domestic; show number of households. _____
e. Other; describe fully. _____

95-10454

9. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
 b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE	NE	NE	NE	NW	NW	NW	NW	SW	SW	SW	SW	SE	SE	SE	SE	TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
54N	5W	19			M	M			M	M	M	M	M	M	M	M	M	M	
		20							M	M	M	M	M	M			M	M	
		29						M											
		30	M																
54N	6W	24	M	M	M	M									M	M	M	M	
		25	M	M	M	M										M			

Total number of acres to be irrigated: _____

10. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping _____
 Existing water right 96-7085 or 95-9587 _____

11. a. Who owns the property at the point of diversion? CDS Stoneridge Associates-Land LC
 b. Who owns the land to be irrigated or place of use? _____
 c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: Municipal water company regulated by IPUC

12. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary.

This water will supplement water from the existing water right 96-7085 or 95-9587. There currently is a well field with 3 wells that can be pumped from. This additional water right will allow multiple pumps to operate at the same time and will provide water for future demands.

FWS # 101090009

13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½"x11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. (A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.)
Map shows the current IPUC specified service territory and location of diversion.

BE IT KNOWN that the undersigned hereby makes this application for permit to appropriate the public waters of the State of Idaho as herein set forth.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is

APPROVED

Date

APR 21 2005

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. **READ CAREFULLY!**

GENERAL CONDITIONS:

1. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one(1) year from the approval date for completion of the well unless an extension has been granted.
2. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare, which may be required before construction of the well. All wells must be drilled a minimum distance of 100 feet from a drain field. Domestic and Public Water Supply wells must be drilled a minimum of 50 feet and 100 feet respectively from a septic tank.
3. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
4. Approval of this drilling permit does not authorize trespass on the land of another party.
5. This permit does not constitute other local, county, state or federal approvals, which may be required for construction of a well.
6. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
7. If a bottom hole temperature of 85 or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
8. Idaho Code, S 55-2201 - 55-2210 requires the applicant and/or his contractors to contact "Digline" (DigLine is a one-call center for utility notification) not less than 2 working days prior to the start of any excavation for this project. The "DigLine" Number for your area is 1-800-342-1585.
9. Please be advised that this drilling permit should be considered and treated as a preliminary permit. If you are in disagreement with this preliminary permit you have fourteen (14) days of the service date of this permit to petition the Department for reconsideration pursuant to Section 67-5243, Idaho Code.
10. The well tag for the drilling permit/start card shall be securely and permanently attached to the well casing through welding or by the use of four closed end domed stainless steel pop rivets. The tag attachment will be done at the time of completion of the well, and prior to removing the drill rig from the drill site.

RE: Stoneridge, DW Loan #9918, Well #3, Well Site Approval

Dear Dean:

On 2/10/05, Tony Davis and I inspected the well site for the proposed new Stoneridge Utilities' Well #3 (PWS #1090009). The well site for Well #3 is located as shown on site plan enclosed with this letter. This new well is assumed to be part of the well field that includes existing Wells #1 and #2. This will need to be confirmed during the test pumping.

Please observe the following setbacks and restrictions. The well must be located in excess of:

- > 50 feet from a sewer line,
- > 100 feet from all septic tanks,
- > 100 feet from all individual home septic tanks,
- > 100 feet from all individual home seepage pits,
- > 100 feet from all privies,
- > 50 feet from all livestock,
- > 50 feet from canals, streams, rivers, ditches, lakes, and ponds
- > 50 feet from all tanks used to store non-potable substances.

In addition to these general set-back distances, the areas where the two existing and one proposed well sites are located have lawn irrigation piping for the golf course within 50 feet of the wells. The irrigation water comes from a lined pond (water feature) located about 1500 feet southeast from the well site. These irrigation lines carry "nonpotable" water and are considered potential sources of contamination. As we discussed, to remedy this situation you will be converting the irrigation lines within the 50 foot radius of each well to carry only potable water supplied from the wells. There is also a manmade stream, pond and 8-inch return water pressure line located within the 50 foot radius of the two existing and one proposed well sites. The water used in this water feature comes directly from the wells. The stream and pond also have HDPE liners to minimize the leakage into the ground. The stream, pond and 8-inch line will not be considered potential sources of contamination.

The well lots for these wells (the area within the 50 foot radius of each well) are part of the golf course. Pesticides, herbicides or fertilizers can only be applied with the approval of DEQ.

RE: Stoneridge, Well #3, Well Site Approval
February 24, 2005
Page 2

The three (3) wells are considered a well field. Prior testing of the existing wells has satisfied the requirements for the majority of the chemicals and compounds. The tests that will be required are the following:

1. Corrosivity
2. Nitrate/nitrite
3. Total coliform bacteria

The well lot (in this case the 50 foot radius around each well) must be owned fee simple by the water system or controlled by lease for a period that is equal to the useful life of the well. DEQ assumes that the well lots are owned by the same entity that owns the drinking water system (Stoneridge Utilities). If this is not the case, please provide an explanation for the ownership of the well lots and how this complies with intent of the ownership requirement.

Prior to drilling, plans and specifications (P&S) for the well and the drilling must be approved by DEQ. Plans and specifications for the construction of Well #3 were submitted to DEQ on 2/14/05. DEQ commented on the P&S in a letter to you dated 2/24/05.

Please call if you have any questions.

Sincerely,

John Tindall, P.E.
Staff Engineer

RE: Stoneridge, DW Loan #9918, Approval of Plans and Specifications for Construction of Well #3

Dear Dean:

The plans and specifications titled "Stoneridge/Happy Valley Replacement Well No. 3" prepared by Joe Olmstead, P.E., of Sewell and Associates submitted 3/8/05 have been reviewed. The project will construct a new well (Well #3) to replace Well #2. Well #2 will not be abandoned at this time because it may be utilized in the future.

Joe has adequately addressed the comments in the 2/24/05 DEQ letter. The plans and specifications were found to be in accordance with the Idaho Rules for Public Drinking Water Systems and are approved for construction purposes in accordance with Section 39-118 of Idaho Code.

Inspection of construction activities approved herein must be done by an Idaho licensed Professional Engineer (P.E.) or by someone under the direct supervision of a P.E. If major modifications to this accepted design are necessary, the design engineer must secure DEQ approval of the changes prior to implementation of the changes.

Section 39-118 of Idaho Code requires preparation of complete and accurate as-built plans as certified by the inspecting engineer. The as-built plans need to be submitted to DEQ for review and approval within thirty (30) days of completion of construction. If construction is not completed within one year of the date of this letter, the DEQ construction approval expires. An extension may be granted if the design engineer submits a written request that DEQ re-approve the plans and specifications. Any contingencies attached to construction approval must be specifically and adequately addressed in writing by the engineer before as-built certified plans and specifications can be approved.

Joe explains in his letter that the contract for constructing the well will be negotiated through a change order with David Bellomy Excavation and Pipeline Specialists instead of bidding the well construction as a new project. Bellomy is the contractor previously awarded the contract for completing the first phase of the project (connecting Stoneridge and Happy Valley Ranches). A complete and signed change order will need to be reviewed and approved before any costs for the drilling can be reimbursed. Following completion of the well construction, another set of plans and specifications will need to be submitted for the installation of the pump and associated piping.

Please call if you have any questions.

Sincerely,

John Tindall, P.E.
Staff Engineer

Stoneridge Ground Water Rights

Stoneridge Utilities (SU), a private company regulated by the IPUC and DEQ operates the water and sewer systems serving the Stoneridge and Happy Valley Ranchos developments. SU is a successor to the Bonner Company, the original developer of the water system. The Bonner Company obtained the original rights to withdraw water from the ground in water right number 96-7085 which was requested in 1968. At that time the requested amount was 5 cfs (2250 gpm). The Bonner Company chose not to update that right in 1983. In 1984, IWR changed the right to 1.89 cfs (850 gpm) based on the installed pumping capacity.

Currently well no. 1 has a capacity of approximately 850 gpm and well no. 2 had a capacity of 600 gpm before it failed. The plan is to discontinue the use of the existing well no. 2 and develop a new well no. 3 that would have a capacity of 600 gpm. The new well would be located near the existing wells, which are located over the Rathdrum aquifer.

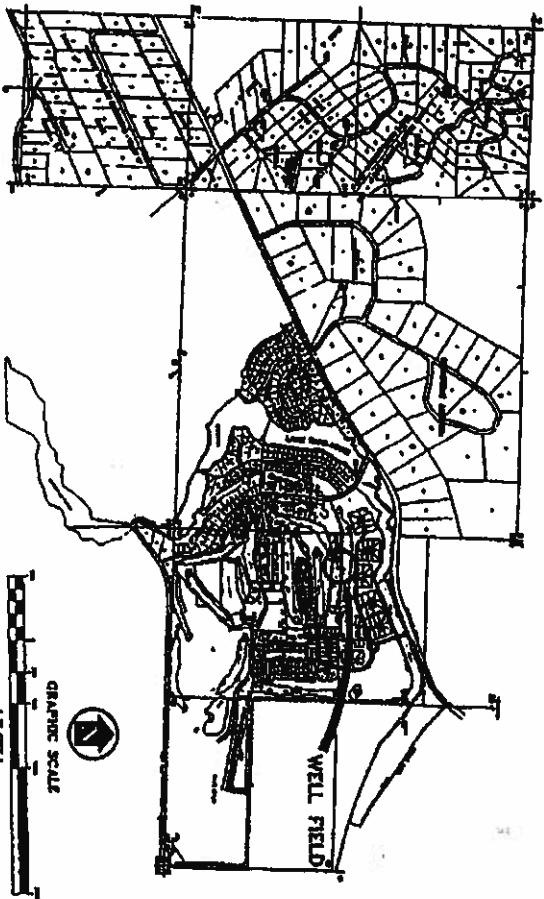

The existing municipal water system is designed to be served with two wells having a combined capacity of 1400 gpm. The present system will serve more than 710 Equivalent Residential Users (ERUs) and irrigate the golf course. The old well no. 2 will be not be abandoned, but instead held in abeyance for possible redevelopment at a lesser flow rate.

Per my discussion with Bob Haines at the IWR, the new well can be drilled under the existing water right. To legally use both wells at the same time, a new water right needs to be obtained. The new water right would be for municipal purposes in the amount of 650 gpm (1.5 cfs). The right would be continuous through the year. This water right would be for use within the service territory of the water system. The IPUC service territory would be referenced and then as the service territory boundaries are changed, the water right service area would change with the service territory. The new water right would have a current priority date.

The new water right would reference that the water could be withdrawn from any of the three wells operated by Stoneridge Utilities. Regardless of where the second well is located, the new water right should be applied for quickly. Currently there is considerable inter and intra state discussions about the water in the Rathdrum Aquifer, of which the SU wells withdraw from, so it would be good to tie up the rights to the water that is being used as soon as possible.

Bob Haines noted that the results of the adjudication of the surface water rights will continue to govern, in which case the amounts of the surface rights will not change until challenged in court.

Re: Application For Permit to Appropriate the Public Waters of The State of Idaho
CDS Stoneridge Utilities, LLC #95-10454

Dear Mr. Olmstead:

As per our telephone conversation on May 1, 2009, the department is going ahead with the advertising of the above said application; however, before a permit can be issued the department will need some additional information. Please provide an explanation that justifies the need for an additional 2.22 cfs for the Stoneridge service area. This would include what is currently being served as well as an estimate for what will be served in the future such as number of homes, condos, etc.

If you have any questions, feel free to contact me at this office.

Thank you.

Sincerely,

Keith E. Franklin

RE: Stoneridge Utilities
Application for Permit

IDWR / NORTH

Dear Sirs,

The Stoneridge Water Company is submitting a application for permit for additional ground water rights. CDS Stoneridge Associates-Land LC purchased Stoneridge Inc. several years ago and now operates the water system as CDS Stoneridge Utilities LLC dba Stoneridge Water Company. The Stoneridge Water Company is regulated by the Idaho Public Utility Commission.

This application for permit for a new water right is to supplement an existing ground water right that Stoneridge Water Company has for delivering water as municipal water purveyor. Currently the company has a 3 well field that has the ability to pump at more than the permitted rates. As part of the application for permit is a map showing the service territory and the location of the well field. This requested permit will allow the operation of more than one pump at a time and meet the growing demands on the municipal system. Attached to the permit application is a check in the amount of \$330.

Joe M. Olmstead, PE
Consulting Engineer

RE: Application for Permit No 95-10454

Dear Applicant(s):

The Department of Water Resources acknowledges receipt of your water right application. Please refer to the above referenced number in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the Priest River Times on May 20 and 27, 2009, and in the Bonner County Daily Bee on May 21 and 28, 2009. Submittal of protests to this application will be allowed for a period ending ten days after the second publication.

If the application is protested you will be sent a copy of the protest(s). All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in Boise for final processing. The State Office will notify you of any action taken on the application and will send you a copy of the permit if approved. A typical processing time for an unprotested application is about eight to twelve weeks.

Please feel free to contact this office if you have any questions.

Sincerely,

Keith E. Franklin
Senior Water Resource Agent

RE: Application for Permit No. 95-10454, 96-9428 and 96-9430

Dear Sheri:

Enclosed you will find a legal notice which we wish to have published in your newspaper on the dates indicated, May 21 and 28, 2009, (once a week for two consecutive weekly issues). If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. Please send the affidavit and bill to this office before 06/08/2009. Your cooperation is ALWAYS appreciated.

Sincerely

Dianne

Subject: Legal notice for publication on May 20 and 27,

Attachments: CoverLetter 05-13-09 PRT e-mail 95-10454,10535, 97-7485.doc; LegalNotice 05-13-09 PRT e-mail 95-10454,10535 97-7485.doc

Good morning to you, Shannon,

Attached is our cover letter requesting publication of a legal notice on May 20 and 27, 2009. The legal notice is also attached.

One of the applications in this legal, the CDS Stoneridge Utilities LLC, is also scheduled to publish in the Bonner County Daily Bee - on May 21 and 28, 2009.

If you have ANY questions, please call me or reply to this e-mail.

Shannon, I am assuming that you are still only publishing on Wednesdays. If you have gone to a daily publication, please let me know because then we would schedule things for publication on Thursdays.

And by the way, it's ALWAYS a pleasure to work with you, you are VERY helpful.

Don't count the days, let the days count.
