RE: Application for Permit

Dear Applicant(s):

The Department of Water Resources has received your water right application. Preliminary review of the application indicates that it is incomplete and cannot be accepted for processing. We are returning your application to allow you to complete the necessary items. The required information is described below.

The Ownership of Place of Use was not provided correctly.
Please provide a recorded warranty deed showing ownership of property.

The Nature of Proposed Use was not provided correctly.
According to your application, it appears you want water to irrigate lawn, garden and mature trees. If this is your intent, then the proposed use should be irrigation.

The Quantity was not provided correctly.
For irrigation of 5 acres or less, IDWR allows up to .03 cfs/acre and 3.5 af/acre. Your proposed flow rate and volume surpasses the allowed amounts. Looking at Lemhi county taxlot data which was updated March 2009 the proposed place of use could cover .6 acres. Is this correct? If so, I would be recommended applying for the full .6 acres.

The Period of Use was not provided correctly.
The period of use for your particular area is 4-1 to 10-31.

Please feel free to contact this office if you have any questions.

Sincerely,

Blake Jordan
Sr. Water Resource Agent
