RE: Destruction of irrigation facilities

Dear Mr. Stanley:

My office has been retained by Curtis Baum with regards to your destruction of their irrigation facilities. It is my understanding that over the last few months, you have repeatedly harassed and annoyed the Baum family in the quiet enjoyment of their property. I have been provided pictures of damage that you have caused to the Baum property. Most recently, you have used your back hoe to dig up the Baum's irrigation line and have capped and filled in the hole. As a result, the Baums have been unable to receive their water for their property. The Baums have made repeated requests to you to cease and desist but you have failed to heed their warnings. In fact, it appears that you claim justification for your actions because Randy Marble has told you to do these things. Please be aware that just because Randy Marble tells you to do something, it is not legal justification for your actions and you can and will be held legally responsible.

This letter is sent for the specific purpose of demanding that you immediately begin reconstruction of the water line that you destroyed. If you have not begun of the reconstruction of the water line on or before Tuesday, July 7, 2009, our office will seek an immediate temporary restraining order against you and will follow up with additional legal action. Furthermore, after you have repaired the waterline, you are to remain off of all of the Baum's property.

If either you or your attorney have any questions related to this matter, please feel free to contact me at (208) 233-0132. Your prompt attention to these matters is required.
