Re: Application for Transfer No. 73486, Water Right No. 63-4288
84

Dear Terry:

The above referenced application has been held for the past year as noted in my June 6, 2008 letter to you in that regard. I write today to check the status of the situation and to determine if the Idaho Department of Water Resources (IDWR) should continue to hold the application ("delay in processing") or not. Please provide a summary of the current situation.

If the applicant or new property owners identified in your June 3, 2008 letter want the application to be held without processing, some evidence of due diligence should be provided as noted below.

- 1) Assignment of application – Apparently the applicant is no longer involved with the project. Applications are personal property not appurtenant to real property. The application should be assigned to a current owner(s). This can be done by a letter from the applicant since there is not an IDWR form for assigning transfer applications.
- 2) Progress to date – Please provide a summary of efforts made to date regarding the project. This can include an estimate of work effort and expenses to date, a brief description of progress regarding any other required approvals (city, county etc.), and an explanation of why more time is needed.

Please submit the requested information by August 1, 2009 for the application to remain active. The application will be rejected without a timely response. The application fee for a rejected application will not be refunded.

Please let me know if you have any questions. Thank you for your attention to this matter.

Sincerely,

Steve Lester
Water Rights Supervisor
