RE: Field Examiner Information for Permit 78-7356

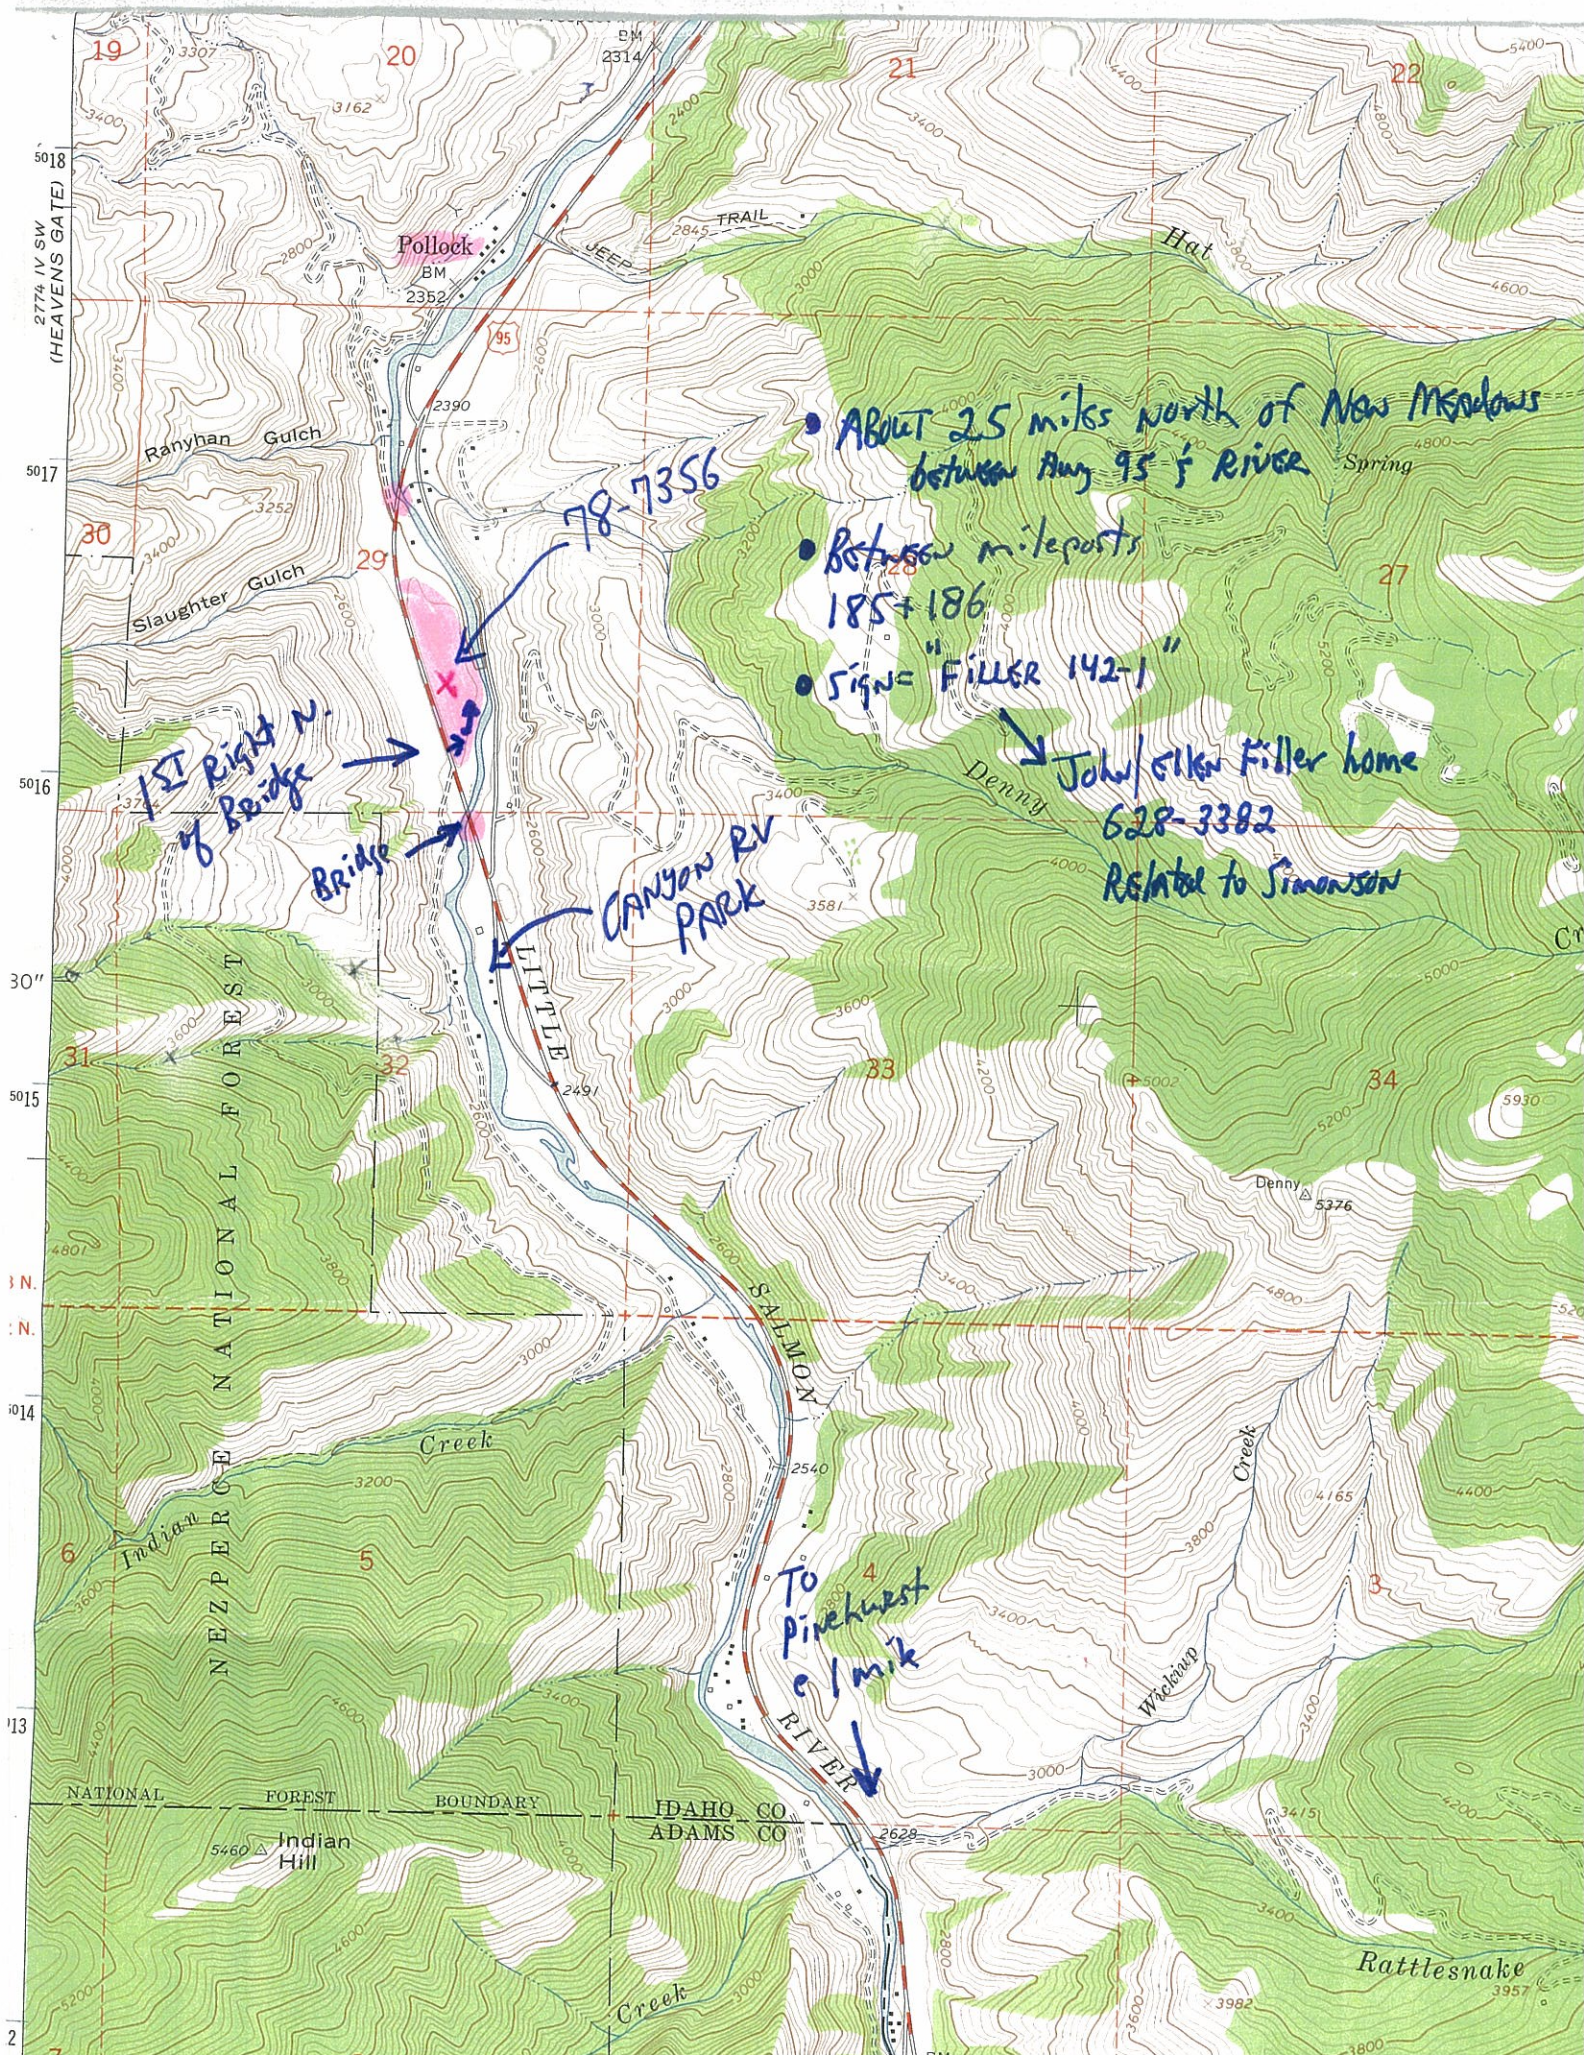

This information can be used when a field exam is conducted for this permit.

Owner Larry Simonson of Simpco Lands requested a site visit to verify compliance with condition of approval X15 for a fish screen. He asked for this help before re-installing the pump in the river (typically late June or early July, he said). He noted it would be impossible to verify compliance when the screen is in the river (too deep).

I visited the site on May 21, 2009 with his son, Grant Simonson. I observed the 1/16 inch mesh fish screen for this diversion as noted in the enclosed photos.

The requirements of condition X15 have been met.

Also attached are directions to the site.

Photos 5/21/09 about 3 p.m.

Photo #1 – Fish screen for river pump.

Photo #2 – Close up of fish screen, measured the mesh at 1/16 inch.
