Daniel,

I have one more change for you on your water right application for the well. I promise this is it and it is to your advantage. If I can get this back before Monday it can go out for advertisement by next week.

IDWR suggested we increase your irrigation right to .15 cfs instead of .10. They also suggested we add fire protection storage at .1 af.

If you could please put your initials on this form and fax it back to Jean Robertson at IDWR. Her fax number is 736-3037, please put ATTENTION Jean Robertson. Also please send me a note via e-mail confirming you have approve this. That would be very much appreciated.

I contacted DEQ in your behalf this week and they are sending a letter of support for the project. This is the last piece (I believe) to have this well permit advertised. The pump is in, the electrical is complete. All that is left is to hook up the system and deliver the water to the location in the ditch that Dave recommended. It will also fill the pond for you.

Thanks so much. Feel free to call me if you have any other questions. My cell is 208-940-0406.

Karma Bragg
