Transfer No. 75772
Applicant: Six S Ranch LLC
Subject: Adding an Additional Point of Diversion on White Pine Creek
Ref: Attachment #7A (modified)

To Whom It May Concern:

As the water master of MCWD45F, I have no problem with the additional diversion point on White Pine Creek at Section 23 NWNESE. But what is shown on the map that was submitted is incorrect on what you show in attachment #7A. I have included a modified version to be used to cross-reference what I am trying to get corrected.

- 1) From the New POD channel which runs directly into the original Decreed POD in Section 24 SENWNW but you show White Pine Channel running all the way over to 1050 East (road) in section 13. This is incorrect. The White Pine Channel runs directly down into section 13 (NWNE) grid across 1000 South (under road) into section 12 (SWSE) grid into Land Creek (as its return) Channel.
- 2) The Brim Creek Channel begins back up in Section 25 (SWSE) or above that location. It runs almost into 1050 East (road) but swings to the NW and drops on down into the area of section 13 (SENE) under 1050 East road (which was the original channel). It will be noted that the way the contours of the ground when irrigated, both White Pine and Brim Creek will intermingle but neither creek joins together as pictured in attachment 7A.
- 3) It will also be noted that Land Creek Diversion "LA" lateral in Section 23 heads due East and connects with White Pine Decreed POD, that's incorrect. The lateral basically will end in Section 23 (NENE) grid and falls with contour of ground going NW and dropping into other laterals and head east towards Park Lane Rd. Only when the NEW POD is used will the water intermingle with the Land Creek water on the "LA" lateral.

Respectively submitted,

Don G. Gunderson
