Subject: RE: Licensing Priority List

Aaron,

There is some information in these two files, like an exam had been done but evidently either more information was needed or for some other reason the report was never turned in. I will delve into them and see if there is enough information to complete a field report. If not, I'll let you know if we need to remove the exam date or something. I'm thinking at this point that we won't. Thanks for your quick response and I'll work on getting them completed!
Jeanie

Subject: Licensing Priority List

Hi Jeanie,

As a follow-up to our discussion this morning about the field exam/licensing priority list, I checked on water rights 47-7624 and ~~47-7723~~ that you mentioned. These rights are in the Licensing Priority List spreadsheet under the "Exams Done, Issue Licenses" tab. The database query used to generate this spreadsheet shows that an exam date has been entered for each of these rights in the database, 08/23/1985 and 10/21/1986 respectively. However, we have not received the field reports here in the S.O. A possibility that I did not consider is that the field exam may have been conducted years ago but the report has not been completed. This is something I would have eventually encountered in trying to issue licenses for these rights. Perhaps regional office staff could address this and prepare the field reports if there is adequate documentation of the beneficial use (msmt notes, photos, diagrams). If it is necessary to complete an additional field exam, perhaps we should remove the exam date from the database to eliminate any confusion. Any additional thoughts?

Thanks,

Aaron
