Subject: location confirmation
Attachments: 22-7790 point of diversion.JPG

Doug,

I have attached a screenshot of 2004 aerial photography of the high school and an overlay which shows several orange triangle shapes. Those triangle shapes represent points of diversion in our water rights database.

As you can see there is more than one triangle on the high school property. Based on GPS data collection done by DEQ, I have the City of Driggs' well located in a parking lot on the south side of the high school. But I have other choices. I am assuming that the high school has at least one well of its own and the other shapes is the location of their well(s).

Would you please confirm your well location for me? I can do some clean up in the database while I'm in this area of our records. Thanks for your help.

Michele
