RE: Application for Permit No 92-10033

Dear Mr. Franklin,

I am writing in request to the status of my application for permit number 92-10033. As it has been about sixteen weeks since the "legal notice of the application" was published for public consideration I expect a decision by the Department of Water Resources has probably been made on the application. However, if there is more information from me that is required I am ready to provide and forward whatever I can.

I am presently spending the winter in Texas as I do not have access to my Idaho property at this time of year. Benewah County does not maintain the road to my property and so the road remains impassable during winter months. I usually am able to access the property about the middle of April and that is the time I hope to return.

My address till April is 13723 Landmark Hill, San Antonio, Texas 78217. Telephone number is (210) 655-0642. However, my mailing address in Idaho is always active. The Post Office forwards any and all mail to me wherever I may be during the winter seasons.

I really do miss being in Idaho. As a result, I watch the weather channel to keep informed of the weather around St. Maries and it appears so far that parts of Idaho will not get the heavy snowfall it received last winter. I hope that holds true for my area as the deer population really took a big hit this past winter. Of course, we had another factor to contend with and that was the presence of large packs of dogs in the area. They were running down anything that moved. We have informed the Department of Fish and Game of the activity of these dogs and hope they will be effective in eradicating them.

Sincerely,

B.C. Morehouse.
