The IDWR Planning Section does not wish to raise any public interest concerns over Application No. 85-15714, which proposes the use of 0.55 cfs of water from groundwater and an unnamed stream, tributary to Lawyer Creek.

The applicant should be aware that the Idaho Water Resource Board holds minimum stream flow water right 85-15616 downstream of the applicant's point of diversion. As a junior water right holder, when the minimum stream flow is not being met, the applicant's water will be curtailed.

The Idaho Water Resource Board would also like assurance that the applicant's water right will be actively administered to protect the Board's minimum stream flow right.
