

MEMORANDUM

Date: Aug 4, 2009
To: Water Right File 63-31862 Hillsdale Estates
From: Michele Edl
Re: license review

Applicant

SPF Water Engineering has been hired by the Hillsdale Estates Homeowners Association to conduct the beneficial use field exam for permit 63-31862. On April 23, 2009, the Department received a field exam report confirming beneficial use through permit 63-31862. The examination had been conducted on April 8, 2009 by Terry Scanlan of SPF. Mr. Scanlan is a certified water rights field examiner. I changed the representative from Norm Young with ERO Resources to Terry Scanlan with SPF Water Engineering to receive correspondence for this permit.

I was asked to review SPF's exam report for completeness and have accepted it, conditionally. Corrections were necessary to the calculations and the place-of-use aerial photo/map submitted in the exam was not consistent with the grid layout. The map showed one additional quarter-quarter in use than the grid. To reconcile those two issues a revised calculation page was emailed to me and Lori Graves with SPF agreed that a licensing amendment will be necessary to correctly list the entire place-of-use.

The address of record in IDWR for the permit holder failed delivery on April 24, 2009 and is not the same as that listed in the field exam report. I requested an address change from SPF and on 7/22/09 Lori Graves acted on my request. Subsequent to that, I learned that I could change the address based on the field examiners report.

Source and POD

The three points-of-diversion associated with this permit and with sibling water right 63-12125 were not GPSd by SPF personnel during the field exam and were not provided as electronic shape files.

I associated three point-of-diversion shapes to existing spatial data points. Well #1 had been GPSd by DEQ. The newest well, well #3 was drilled in July 2004. IDWR personnel determined its GPS location during a field inspection of the site. Well #2 was located by comparison of the field exam photo with the subdivision map and with recent aerial photography. I correlated several points from other layers to these well locations.

At the time the permit was issued, the department was concerned about the location and depth of wells in this area. The permit condition which defines the water bearing zone addresses those concerns. The well screening shows compliance with permit conditions. Additional information has become available to the Department which eliminates the need to retain the water bearing zone condition. These PODs are currently considered to be located outside the area of concern so that condition was not carried forward to the license.

Water Use

Although there is a permit condition alluding to a future requirement for measuring devices, no measuring devices were required. The field examiner found totalizers in place and cataloged them in the exam report, but no measurement records were submitted with the exam and no measurement was taken.

IDEQ has recognized that Hillsdale Estates Homeowners Assn has a public water supply system

and has given it PWS identification #ID 4010218. I contacted the IDEQ regional office and requested a copy of their latest measurements and field inspection report. They had a backlog of inspections which included the inspection of the system for Hillsdale Estates, and so were not able to supply me either of the requested records.

The three well-pump pairs associated with this right and with sibling right 63-12125 appear to have the potential to deliver more than the permitted amounts. The initial well log and the drawdown calculations for well #3 indicate that it will produce 1700 gpm or ~3.79 cfs. The field examiner's report for right 63-12125 states that wells 1 and 2 could potentially deliver 1200 gpm and 660 gpm. Therefore the total system capacity is 3560 gpm or ~7.93 cfs.

Transfer 71182 on water right 63-12125 recognized only 0.33 cfs and 63.6 af for the first phase (53 homes) of the Hillsdale Estates-Star Ridge subdivision. The field examiner's report for this right, (63-31862) recommended the maximum authorized by the permit and proof of beneficial use, an additional 3.26 cfs rate. The total rate authorized for domestic use by the two sibling water rights 63-12125 and 63-31862 becomes 3.59 cfs ($3.26 + 0.33 = 3.59$), less than half the systems potential pumping ability.

The platted lot sizes in the Hillsdale Estates-Star Ridge subdivisions are more than ½ acre; most are 1 acre. The field exam report states that irrigation water rights to cover the additional irrigated acreage have the domestic wells as points of diversion. According to SPF personnel the potable and non-potable systems are separate but share some of the same wells. Other wells dedicated to irrigation only, are also located within these subdivisions.

A 36,000 gallon storage tank is located adjacent to well #1 and connected to the supply system.

Place of Use

The exam report states that this water right is for domestic use in 261 homes and appears to have based that recommendation on a lot count rather than a count of residences. The subdivisions are not completely built out although most of the lots have been sold.

I requested the place-of-use shape files from SPF Water Engineering and they supplied them to me through an email. Unfortunately, the SPF shapes also included common and open areas which I edited from the place-of-use before associating it with the water right. The SPF shape showed a domestic use in a portion of the NESE of section 29 that had not been listed in the place-of-use of the permit. The use was confirmed by SPF personnel so a licensing amendment will be needed.

None of the drawings made available to me showed stub-ins to the lots. The only below ground drawing included in the field exam report showed the water system main lines but none of the smaller laterals. I compared the plat maps, recent taxlot information and the revised water right place-of-use shapes. My total domestic count is 259. I found two lots had been counted by SPF personnel and recommended in error. One constructed residence in Hillsdale Estates no 3 occupies two lots (block 7 lots 17 and 18) and an open area (block 3 lot 58) in Hillsdale Estates no 5 should not have been included as domestic place-of-use.

Calculations

The additional rate confirmed by the examiner is limited by the permit to 3.26 cfs. The additional volume for internal use and ½ acre external use for 259 residences is 310.8 AF. The calculation is: $259 \times 1.2 \text{ afa} = 310.8 \text{ afa}$.
