RE: WR 55-4002 - Property Boundary Clarification Request

Dear Mr. Young,

I have not heard from you on this matter in some time. I would like to reach a final conclusion on this matter at some point in the near future. If you have resolved the issue of land ownership with the state of Idaho and the Bureau of Land Management please submit verification documents of your ownership, so that we may finalize the change in ownership. If you are still actively pursuing the land ownership issues with the State of Idaho and the Bureau of Land Management please submit a plan and timeline outlining how long you will need to make such proof to the Idaho Department of Water Resources (the Department) within 30 days.

If you wish to continue processing a change in ownership in regards to this water right, as it currently exists, because the property described in the warranty deed legal description represents a fraction of the total land associated with the water right, an ownership split will need to be filed. An ownership split divides the current water right into two or more parts, one part will be transferred into your name and the remaining parts will be transferred into the proper owner's name. To file an ownership split refer to line instructions six and eight of the "Notice of Change in Water Right Ownership" form for instructions in preparing the necessary documents.

Because the Department cannot process the ownership change without proper documentation, we will hold any action on your notice regarding water right **55-4002**, pending receipt of the requested information.

Please note that water right owners are required to report any change in water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet (www.idwr.idaho.gov) to obtain the proper forms and instructions.

Please feel free to contact this office if you have any questions regarding this matter.

Respectfully,

Mathew Weaver, PE
Staff Engineer
