CONDITIONS OF APPROVAL

1. Water shall not be diverted under this right when flows in the St. Maries River are below established minimum flow amounts. The right holder shall be responsible for monitoring the daily flow of the St. Maries River near Santa using real-time data published on the Internet by the U. S. Geological Survey and shall cease diverting water when flows in the St. Maries River are below established minimum instream flow amounts.
2. A fish screen of 1/4 inch or smaller mesh shall be installed and maintained at the point of diversion.
3. The approach velocity at the point of diversion shall not exceed 0.5 feet per second.
4. Water shall not be diverted for fire protection use under this right except to fight or repel an existing fire.
5. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
6. Stockwater use is for 25 mixed stock.
7. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.0 afa per acre at the field headgate for irrigation of the lands above.
8. This right does not grant any right-of-way or easement across the land of another.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. The water right confirmed by this license is subject to all prior water rights and shall be used in accordance with Idaho law and applicable rules of the Department of Water Resources.

Signed and sealed this 10 day of August, 2009.

R. L. Hayner for
GARY SPACKMAN
Interim Director
