Re: Application to Appropriate water 75-14490

Dear Sharla Cox

Enclosed is the information that you requested.

1. No don't believe so the water master does an out standing job of keeping the water running to the one's that has the right to it.
2. The .04 cfc requested is sufficient amount of water to water my lawn, trees and water the small amount of live stock that I have and ever intent to have.
3. The amount of water being used at this time to water existing lawn, trees and live stock is sufficient.
The way the water is will be diverted is as follows, 2" pipe siffing form ditch to 2 20 gal tanks then regulated to only pull the amount of water that does 3-4 small water sprinklers.
4. The residents on both side seams to want more water for themselves.

Sincerely.

Geary and Billie Spath
