RE: App For Transfer 75421

Dear Mrs. Gardiner;

While reviewing your application prior to advertising, I found an error that needs to be dealt with. Due to the odd cross limits between your Cassia Creek rights and your groundwater rights, I mistakenly concluded that you could irrigate up to 366 acres in a given year. The correct limit should have been 396 acres, meaning that the proposed new pivot could be 24 acres larger than is shown on the application. The 83-acre pivot shown on the aerial photo has a radius of 1073 feet, whereas a 107-acre pivot would have a radius of 1218 feet. If the larger pivot will fit into the space you have available, I can add it to the photo and determine where the additional acres lay in order to produce a corrected application for your signature. Or do you want to put the additional acres somewhere else on your farm? Or do you just want to leave the application the way it is now?

Regards,

James E. Stanton
Sr. Water Resource Agent
