Hi Aaron: Thank you for your quick response. Please delete my Statement of Completion and I will submit another one next summer when I can meet with a field inspector on the St Joe property.

Mr. Flammand,

Thank you for providing photographs of your water diversion system. This may be helpful in reviewing the beneficial use developed under your permit. However, Idaho Code § 42-217 requires you to submit your statement of completion along with the appropriate filing fee, in this case \$50.00. Your statement of completion is not acceptable without the fee. Once IDWR receives payment, a Department employee will contact you sometime in the future, likely when you or a representative are available, to complete the field examination.

In response to your flow rate conversion question, 1 cubic foot per second (cfs) is equivalent to 448.83 gallons per minute (gpm). So, 0.20 cfs is approximately 89.8 gpm and 15 gpm is approximately 0.03 cfs.

Please call or email if you have any further questions.

Hi Darla: I just received your Proof Acknowledgment Letter Dated 6-24-09, Permit No. 91-7185. I have been out of town until now and will be gone most of the summer. I will be moving my RV and small 15 GPM water system.

Since I will not be at the St Joe for a field inspection until next summer, I have attached photos of my small 15 GPM water system. Please advise if this is good enough for proof for your Statement of Completion. If so, do I still need to mail a \$50.00 check for the license examination fee?

If the photos can not be accepted then please delete my Statement of Completion and I will submit another one next summer when I can meet with a field inspector on the St Joe property.

Also, how many gallons per minute equal .2 cfs?
