Describe the reason for the proposed changes

Transfer ties 2 existing wells (actually occurred in 1998), and shows what land is currently irrigated. Transfer straightens out the boundary between the Patterson and Standlee lands in the E 1/2 Sec. 9 (a few acres were exchanged between the parties, with each keeping all of their existing water rights). Also ties in land below the Northside Pump Ditch that is occasionally irrigated with groundwater (excess canal water is occasionally used above the ditch when it is available). The transfer also changes ownership for Right 36-16499; the other recorded groundwater right on this land is already in our name, but 16499 was not switched over.

4. FOR CHANGES IN NATURE OF USE ONLY

A. Describe the expected quantity of the return flows and location of discharge after the proposed change

B. Describe the effects on other water uses resulting from the proposed change
