Subject: Protest Withdrawals for Water Rights

Contacts: Fred Price
Attachments: Cesario amended.pdf

Fred:

This is the email following my phone message from earlier today.

This concerns two situations protested by BLM, checking to see about possible resolution allowing protest withdrawals.

1) Cesario Application for Permit 78-12361 -- south of Riggins, proposes Hat Creek for personal power production. This application replaces a relinquished permit in which most but not all of the previously approved development was completed. Application 78-12361 listed the incorrect point of diversion on BLM land, and applicant said that was never the intent. The existing diversion is on applicant land as confirmed by an IDWR inspection last summer. Please see the attached copy of the amended application to correct this error. I hope this allows you to withdraw the protest as soon as possible. The applicants are eager to get their application approved and to complete the development to produce power for their place.

2) Brackett Applications for Transfer -- apparently there was an understanding that BLM intended to withdraw its protest. This is a reminder about that if you have not already done that. Please send the protest withdrawal to the hearing officer at the IDWR State Office downtown -- or I'd be glad to convey it to him if it's more convenient for you to provide it to the Western Region office.

Thank you for your help on these matters. Please contact me if you have any questions/concerns.
