Re: Water Rights 22-7698 and 22-7790

Dear Pam,

Our firm has been hired by the City of Driggs to assist them in their water rights needs. They have requested that we complete an Application for Transfer to add points of diversion to the existing municipal water rights. In review, it was found that the City has two permits, 22-7698 and 22-7790, which have been field examined and are awaiting licensing. Permit 22-7698 was field examined on 8/18/2000 and received by the State Office on 2/26/2007. Permit 22-7790 was field examined on 8/6/2001 and received by the State Office 5/7/2007. It is our understanding that a transfer application that includes these rights cannot move forward until the licensing process is completed.

On behalf of our clients, we are requesting that these two rights be licensed as soon as possible. We realize that your workload is very large, but we would appreciate your assistance. Please let us know if there is any way we can assist in this regard.

Regards,

Kristin Moore
Water Rights Analyst
