RE: Your Question On Surveying Units

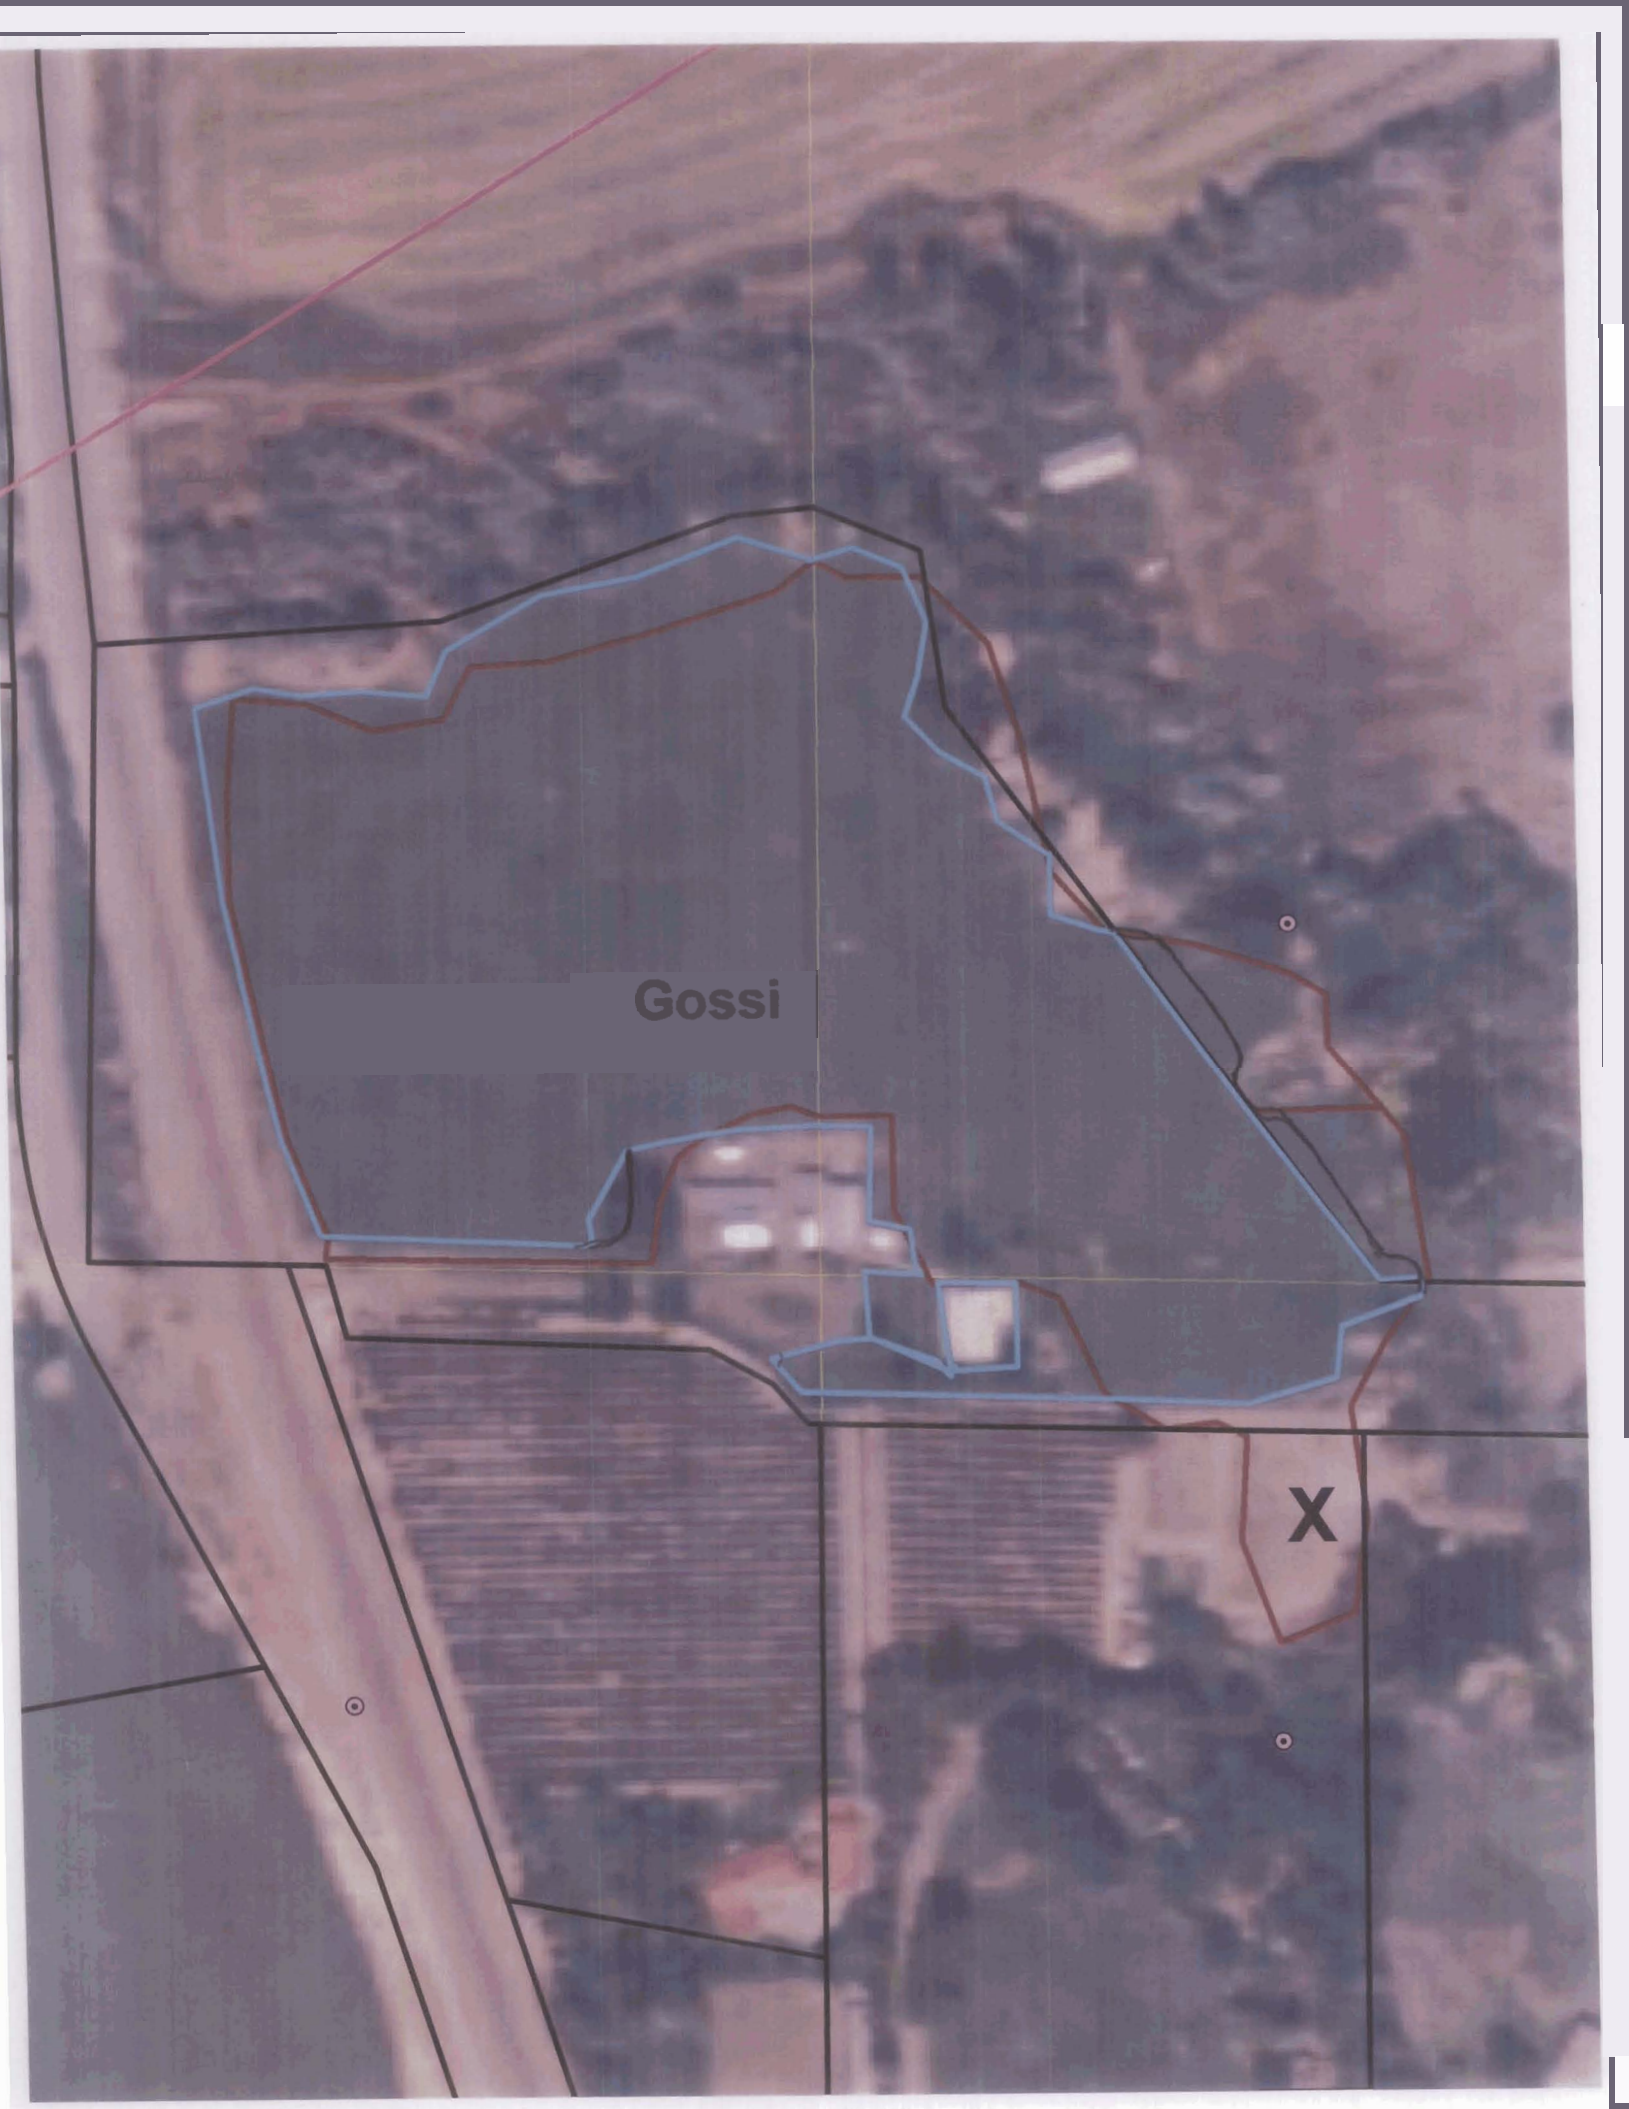

Dear Mr. Gossi;

A rod is 16.5 feet, and a chain is 4 rods (66 feet).

By talking to our adjudication staff, I found out that the shape file for your water right was created AFTER the SRBA decree was issued, and was only meant to be an approximation of your irrigated land. I have developed a modified shape of your irrigated land, and have found that you actually irrigate only 6.7 acres instead of the 10 acres covered by your water right. My shape adds additional land on the north end of your property, and also adds your yard, and removes land that you never owned or never irrigated on the east and south sides of your property. The blue shape on the enclosed photo shows what I am talking about. I have changed the shape in our records accordingly without changing your water right. If you have questions, feel free to contact me.

Regards,

James E. Stanton
Sr. Water Resource Agent

Gossi
