Re: *Applications to Appropriate Nos. 65-23239 and 65-23105; and
Application for Transfer No. 73787*

Dear Gary:

My client, Eagle Springs Ranch, has reviewed the Amended Preliminary Order concerning the above-referenced applications. Eagle Springs Ranch does not intend to pursue further administrative review by way of reconsideration, rehearing or exceptions to the proposed conditions of approval contained in the Amended Preliminary Order. Eagle Springs Ranch would very much appreciate the Department finalizing the permit forms and the water right records to reflect the transfer so that they can be issued as soon as the Preliminary Order becomes final.

Please note that Scott King with SPF identified an apparent clerical error in the Amended Preliminary Order that should not be carried forward in the water right records: at page 7 of the Amended Preliminary Order, under paragraph 8, the flow rate for stockwater for Water Right No. 65-8850 is shown as 0.60 cfs. The actual rate is 0.06 cfs.
