To the Idaho State Water Resource Board:

As a member of the Garden Creek Irrigation Company, I would like to protest the application of Klain Christensen to add another diversion to obtain water. He has two laterals running through his property, more than enough to water the ground that he can irrigate. It is totally unnecessary to add another diversion, especially where Klain is proposing this diversion. It is in the Dennis Toney family's backyard. It would be totally wrong to grant this. I am in complete agreement with the Toney's on this matter it would be very damaging and disruptive to have someone running through your yard at will.

This diversion was mentioned in our water meeting this last March, but was never proposed or voted on. This should have been put before the Garden Creek Irrigation Company and approved or disapproved by the Irrigation Company. What authority did Gary Blanchard have to approve this proposal, without the approval of the members of the Irrigation Company?

Leland Armstrong

CC: Klain Christensen
