Describe what work has been completed toward the development of this water right:
(This must be filled out! If no work has been completed, show "none".)

City obtained funding for a water improvement project last November. The project has been designed and bid and the well was just completed to 620' and piping installed to connect it to a new reservoir being constructed, but pumps have yet to be installed to make the well operational. Costing \$ 96,700⁰⁰

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

Funding was not received until November, waited for spring to have DEQ visually inspect and approve site, drilled well immediately upon DEQ approval. Contractor still has time left on his contract to get well pump installed, tested, and made operational.

Permit holder(s) request an extension to December 31, 20 09.
