

MEMORANDUM

Date: July 01, 2009
To: Transfer 75594
From: mholliday
Re: transfer approval

This transfer proposes to change the point of diversion for groundwater right 25-13974. The right is currently pumped out of a common well with 3 other domestic rights. The change would result in the right being diverted out of a new well located approximately 200 feet southeast of the current point of diversion. Right 25-12712 will also be diverted out of the new well upon approval of transfer 75595.

Authority to File:

Applicant provided quitclaim deed showing ownership of the water right place of use. The water right was not withheld from the sale.

Water Right Validity:

This water right was decreed in the SRBA in 2005. Forfeiture is not an issue.

Injury to Other Water Rights:

No issues identified. Since the new well is located in such close proximity to the existing well, there will be no hydrologic impact.

Enlargement of Use:

There is no evidence of enlargement of use.

Local Public Interest:

No issues identified.

Beneficial Use / Conservation of Water Resources:

No issues identified.

Review of the application finds there is not clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
