Date Filed: 08/05/2008

Place Of Use: IRRIGATION of 36 acres and other uses within parts of S10, T14N, R19E

Remark: This application covers irrigation and additional non-consumptive uses (fish propagation, recreation, heating, commercial and domestic) from a well that was drilled for irrigation under an earlier permit. Geothermal water was encountered during the drilling process, and the heat value of the water must be used before the water can be used for irrigation unless a waiver is granted; a waiver has been requested. The well is located about 3 1/2 miles north and 1 mile east of Challis. The application also requests a second well on the same property, as the first well does not provide enough water for the proposed uses. This application proposes the diversion and use of water tributary to the Salmon River (a federally designated Wild & Scenic River). The decreed minimum stream flow rights for the federal Wild & Scenic Rivers are subordinate to certain categories of water use and to specific amounts of water use established after the minimum stream flow. The non-consumptive uses proposed in this application will benefit from the subordination provision. The irrigation use proposed in this application will benefit from the subordination provision because the diversion rate and acres are the same as those permitted by 72-16699 which have been applied to the subordination amounts specified in the decree for the Wild & Scenic River listed above. Permit will be subject to all prior water rights. For specific details regarding the applica-

tion, please contact IDWR Southern Regional Office at 208-736-3033 or visit the website for the Department at <http://www.idwr.idaho.gov/apps>
