RE: Application for Transfer 75155

Dear Applicants,

I discussed your transfer with our State Office in Boise and they requested additional information regarding the fish propagation use for the proposed ponds where you will share the 2 cfs of water:

- 1) Submit copies of plans and specifications for the project works. The plans must be definite enough to allow for determination of project impacts and implications. For fish propagation facilities the plans must show the number of ponds proposed and give the length, width, and depth dimensions of all ponds.
- 2) Seek comment on the effects of the construction and operation of the proposed project from the Department of Environmental Quality.
- 3) Submit copies of the Private Pond Permit (or your application for the permit) required from Fish and Game for the raising of fish to show the ponds will truly be used for fish propagation and not for other uses such as recreation or aesthetics.

Please submit these items and/or comments by December 12, 2008 so we can continue processing your application. (A copy of your application is enclosed for your use in seeking these items.) If you have any questions, feel free to give me a call at the office.

Sincerely,

Jeanie Robertson
Sr. Water Resource Agent
