Cindy Yenter
Watermaster, Water District 130

Idaho Dept. of Water Resources
Twin Falls, ID

Cindy,

I have attached six plan sheets showing ITD right-of-way (ROW) in T 8 S R 17E Sections 2, 11 and 14. This is north of the SH-25 junction with US-93, on US-93 alignment in the general location of Hwy 93 and 200 N Rd. The state highway corridor generally shows 140 feet of ITD owned land that is west of the gravel road, however the width of the ROW varies.

There are no existing easements or permits which allow any entity to irrigate on state lands or use the state property.

ITD will not make any claim to the water rights which have been used on state lands, as we do not have a use for the water in that area.

The existing land owner or representative will need to contact Dave Jensen of ITD Maintenance staff. Mr. Jensen handles encroachments on ITD property. His phone # is 886-7853 (direct line) or 886-7800 (main desk).

The phone lines at our office have been causing some trouble lately so the message machines may not work.

Sincerely,

Connie Jones
