RE: Off-Setting Applications for Transfer of Water Right 74093, 74094, 74095,
74096, 74396, 74719 & 74781

Dear Applicants & Consultant Representatives:

This package of seven (7) off-setting transfers referenced above has completed review and advertising processes. Final approval documents are being drafted in our Southern and Eastern Region offices.

Offsetting transfers may mitigate for increased depletions to reaches of the Snake River; however, offsetting transfers for water rights with varying priority dates could result in injury if curtailment is necessary due to a water call in the Eastern Snake Plain Aquifer (ESPA). As a result, specific conditions related to these types of transfers will be applied to address the concerns of the effects of the transferred rights within the ESPA during periods of curtailment.

I have enclosed a copy of the proposed conditions for all the affected rights along with a copy of the table from which the curtailment year and percentage amounts was derived for these conditions. If you propose to submit any additional analysis or information that would address this concern, please notify the department within 10 days. If no response is received, the transfers will be issued with the proposed conditions.

If you require additional information regarding this matter, please call me directly at (208) 287-4951, e-mail me at pam.skaggs@idwr.idaho.gov or contact me by mail.

Sincerely,

Pamela S. Skaggs
Water Rights Supervisor

Enclosures

Condition 201

(All offsetting rights)

The combination of changes under Transfer approvals 74093, 74094, 74095, 74096, 74396, 74719 and 74781 provide the necessary mitigation for any increased depletion to connected reaches of the Snake River that would result from each individual transfer. These transfer approvals shall not require mutual dependence for ongoing mitigation.

Any future action, including a subsequent transfer of this right or an order rescinding a transfer approval, which would result in a change to the point(s) of diversion under this right may require mitigation for the effects of the change. Such future action to change the point(s) of diversion under this right shall be analyzed for effects to connected reaches of the Snake River based on the priority date, point(s) of diversion and steady-state quantity as authorized for this right under Transfer approval <this transfer>.

Condition 202

If the point(s) of diversion authorized under this right are included in an area subject to a conjunctive management order curtailing the diversion and use of ground water, this right shall be reduced in rate and remaining volume by the following percentages, based on the priority date of the curtailment:

(35-13916)

- Curtailment senior to 5/16/1980, 1% reduction
- Curtailment senior to 5/4/1978, 62% reduction
- Curtailment senior to 10/16/1974, 71% reduction
- Curtailment senior to 9/12/1973, 74% reduction
- Curtailment senior to 5/26/1971, 74% reduction
- Curtailment senior to 11/15/1970, 77% reduction
- Curtailment senior to 5/23/1962, 100% reduction

(35-13915)

- Curtailment senior to 5/16/1980, 1% reduction
- Curtailment senior to 5/4/1978, 100% reduction

(35-13898)

- Curtailment senior to 5/16/1980, 1% reduction
- Curtailment senior to 5/4/1978, 64% reduction
- Curtailment senior to 10/16/1974, 64% reduction
- Curtailment senior to 9/12/1973, 67% reduction
- Curtailment senior to 5/26/1971, 68% reduction

The preceding reductions shall not apply if the right holder (1) is participating in a mitigation plan approved by the director and administered by a ground water district or other recognized organization, or (2) to the extent that mitigation under item 1 is not sufficient, provides individual mitigation approved by the director. The mitigation under items 1 or 2 must provide compensation consistent with the requirements determined by the director in the curtailment order.
