Re: Application for Transfer of Water Right Nos. 67-14879, 67-14881 and 67-14883
(Transfer No. 75368)

Dear Randy or Kathryn Noah:

The transfer application specified above, filed January 12, 2009, was assigned to me for review and processing. A copy of the application is included here for your reference. Upon review, there are a few corrections that must be made and additional information needed before I can continue processing the application. Those items are:

- Application item # 5 asked for lands irrigated. Here, you listed a total of 24.4 acres, however, the rights being transfer are limited to 19 acres. Irrigating 24.4 acres would be an expansion of the original rights. This item must be amended to reflect the correct number of acres able to be transferred under the rights;
- Item Part 2, # 10 was left blank. This is a question regarding forfeiture and non-use and an answer to this question is mandatory. I see that pages 4, 6 and 8 were added, perhaps by someone assisting you with the application. These pages appear to have been added to inform you of additional information needed and # 10, though not numbered on pages 4, 6 and 8, was not answered;
- Please provide proof of ownership of the field to which you are moving the place of use; and,
- It appears from aerial photographs that both the field historically irrigated under these rights and the field to which the rights are being transferred, are irrigated. IDWR has no record of water rights for the new place of use. How are these being irrigated? Are there shares of a canal company that are used on this property?

The changes to the application must be made on the original. Please gather the required information and then call me 208-334-2190 to set a time for one of you to come in and make the changes on the application.

Please submit the requested information to allow final evaluation of your application to be completed.
