Re: Transfers

On May 14th, 2009, I had a phone conversation with Karl Tyler of Missoula, Montana. We discussed his amended transfer applications, numbered 74741 and 74742. His applications for transfer were for previously decreed water rights 74-37, 74-38, 74-39A, and 74-996. The high flow rights 74-15212 and 74-15213 were included in Part 3C of the transfer applications. During my conversation with Mr. Tyler, I explained that the high flow rights should have been included in the main part of the place of use transfer. Karl indicated that he was comfortable with IDWR adding those water right numbers to his amended transfer.
