Subject: FW: Leadore Transfers 74724 and 74741

Nick,

I had Bob Loucks take a look at the draft transfer as well. His comments are below. Ignore the comments about calling source of the new diversion Lemhi River since we've discussed that before. Although - it is worth noting that transfers on Iron Creek (72536), Pahsimeroi (73687, 73707, 74833, and 73682), and Upper Lemhi (73332) were the same concept but the new PODs reflected the actual water body.

Thanks,

morgan

Morgan,
Transfer 74741 looks fine. I think Transfer 74724 needs a little work. On page 3, 74-39A *as modified by transfer*, the location of the S20 POD is Lemhi River. On page 5, 74-996 *as modified by transfer,* is still only diverted in Sec 28 (L-63). On page 6, Condition #5 should be deleted, this right is never diverted from Big Timber Cr. On page 7, 74-15213 *as modified by transfer*, this right (high water) should only be diverted at BT-2, the S33 location. Condition #4 should be deleted, this right is never diverted from Lemhi River. On page 9, 74-37 *as modified by transfer*, the S20 POD is located on Lemhi River.
Other than those few changes, the transfers look OK.
S/Bob Loucks

All,

Attached are the reworked draft approvals. Wanted to run them by you all - any question/comment on something let me know. Not everything pertaining to the file has been scanned yet, but should be shortly.
