Subject: ground water application for permit 65-23314

Hello John -

Rod Kesler applied for a new permit to irrigate 3 acres from a shallow ground water well. The application was assigned to me for review and processing. Attached is a copy.

The well was drilled in sands and gravels to a depth of 51 feet. I am contacting you because the site is in the Lake Fk. WD 65-K. The creek is about ¼ to the southwest of the site. Do you have any concerns about this well being trib to Lake Fk. Creek?

Thanks -

Re: Application for Permit 65-23314

Dear Mr. Kesler:

The application you filed September 22, 2008, has been assigned to me for review and processing. The water right application proposes ground water use from a well to irrigate 3 acres. A copy of the application is included with this letter.

According to the records of Idaho Department of Water Resources (IDWR), your well was drilled in 2004 under a \$75 domestic well drilling permit. A \$75 drilling permit covers a well that does not require water right approval from IDWR. This is typically a single-family domestic well.

Proposed use from your well does require water right approval, and your water right application seeks that approval. The well drilling fee for a well requiring a water right is \$200 instead of \$75. IDWR must collect the unpaid balance of \$125 for a well drilled under those circumstances.

Please remit \$125 to upgrade your well drilling permit to facilitate processing of your water right application. In the meantime, I will continue to process your application but it will not be approved until the upgrade fee is paid.

Also, in the application, you did not answer Item # 10, which inquires as to additional water rights used on the place of use for the same purpose. I viewed 2004 and 2006 aerials of the property and it appeared irrigated. Please provide information sought by Item # 10.

Please contact me at 208-334-2190 if you need more information. Thank you for your attention to this matter.

Sincerely,

Vicky Music
Sr. Water Resource Agent
